FUEL SAVING.

The cost of fuel is one of the most important expenses in railroad operation, larger indeed in many cases than any other single item of expenditure except wages. Its relation to the total operating charges necessarily varies a good deal in different parts of the country, dependent in large measure on the nearness of a railroad to mines and the cost of coal as affected by other circumstances. But even on roads favorably situated in these respects the cost of fuel is very material, and as much and often more than 25 per cent of all the motive power expenses. Questions relating to the economies in this account have probably been pushed further than in any other department, and have been discussed more widely and longer than most of the other economies which have done so much in recent years to reduce cost of transportation. The subject is so comprehensive that new developments, opening up possibilities of fresh savings, are continually coming to hand. Several railroads have felt warranted in establishing separate departments, having independent direct supervision of the purchase, distribution and consumption of fuel supplies. It is by this method of making special problems of various phases of operation that railroad managers have been able to accomplish some of their most noteworthy results in decreasing expenses.

The methodical investigation which it permits and promotes, together with concentration of ideas by those with specialized knowledge, is witnessed in increased efficiency at reduced cost. One large company, which has gone into this question of fuel saving perhaps more systematically than others, has saved enough to equal the interest on one of its principal bond issues. Another company has saved about 6 or 8 per cent of its coal bill, chiefly by changing the size of coal used. Some of the anthracite roads have been prominent in this respect, having adapted their engines to burn coal formerly discarded at the breakers as useless and unmarketable. The class of engine used has a very pronounced effect on coal consumption, and considerable advance has been made recently in locomotive designing, in securing engines which have the reputation of being "coal savers." The replacement of engines, however, must be necessarily slow, and in the end can only bring about moderate savings.

The chief fuel economies are as a rule secured by a better regulation of the selection and handling of the coal. As we have pointed out above, the class or quality of coal used in engines may afford the best opportunity for effecting a wide retrenchment. If a cheaper coal than has been customary can be profitably used, a small saving per ton quickly mounts up to an important sum with the large quantities used yearly by the railroads. Something more than the difference in price between two varieties of coal decides relative cheapness. The determining factor is really the amount of power obtainable from each ton. One company which made a change in the coal ordered for its engines made an apparent saving of 15 per cent in cost. The loss of evaporative power in the cheaper coal offset half of the gain named above, but the net saving shown was an important item in the year's results. This indicates how carefully the steam-making qualities of coal must be considered in fixing upon the economy of a cheap coal. In the instance mentioned above the loss in poorer steaming qualities was only half as large as the difference in price, and a decided economy was effected by replacing the costlier fuel. The same results would not follow on roads in all parts of the country. In the Far West, particularly, it is desirable to use high-priced fuel, because the cheaper varieties obtainable there are almost worthless as steam producers. Where a company's lines are located near good mines it can usually use with profit mine-run coal, not salable in the general market, and therefore costing little, while the steaming qualities are not inferior to the marketable sizes.

Economy in the distribution and use of coal can often be made as important as in its purchase. The

training of the enginemen in increased efficiency in the handling of fuel offers the largest opportunities for reducing the fuel expenses, next to the supply of the proper coal, if indeed greater saving is not thus possible, for a company may be so situated as to be narrowly limited in the fuel that must be supplied to engines. All, however, can gain or lose much by carelessness or prudence in its consumption, and efforts to educate the employees how to use to best advantage the coal supplied to them are amply repaid In these efforts self-interest is appealed to. Coal premiums are a comparatively familiar variation of this idea, and where this method is systematically and carefully followed up the results are usually satisfactory. Some account may be given of the checks used on enginemen, as concerns the use of coal, on one road which has gone into much detail in introducing fuel economies. A leading idea is an individual fuel record with the enginemen. They are provided with a stated number of coal tickets, which have to be accounted for at the end of the month, the number used in connection with the car mileage made determining the record of each man in coal performance. Each engine going out on a run is delivered to an engineer with its tank full of coal or its equivalent in coal tickets, and the engineer is required to deliver tickets for what ever coal he needs during his run, and for what would be needed to fill the tender when he surrenders the engine at the terminal or to another engineer. The number of pounds of coal used per car mile run is calculated monthly and the record of each engineer is considered in connection with performance and promotion.

More positive methods than this disciplinary and negative one are used. Firemen are carefully trained in the intelligent management of locomotive fires to secure the best use of the coal, and with the personal interest of the engineers in improving their records by low-fuel accounts, their experience is enlisted, as it cannot be under ordinary circumstances, to regulate the coal supply of the engine to the best advantage. The plan has been used on the road where it originated long enough to be able to compare results, and it is found that the records show a material improvement in the coal consumed per car mile. The proportion naturally varies according to the carefulness of the enginemen, being reported as high as 25 per cent in some cases, and not above 8 per cent in others. One very valuable feature of the monthly individual records is that they bring out the difference in the efficiency of the different men and show which need instruction.

STEEL-TIRED AND CHILLED CAR WHEELS.

As serious railroad accidents have been due to the breakages of wheels under cars and locomotives, much attention has been given in recent years to the wheel question, in order to eliminate accidents from that source as much as possible. Formerly wheels were purchased on the makers' guaranty that they would make a specified mileage before being worn out; this has come to be regarded as inadequate protection for the railroads. They now very generally insist on subjecting each lot of wheels purchased to carefully-conducted drop and heat tests to determine their strength and wearing qualities. The stricter specifications of the railroads have resulted in a material improvement in the quality of the metal used in wheels and in the whole process of manufacture. The design has not been much altered during this process of development and evolution, although the size and the weight have increased to correspond more or less with the increase in the hauling capacity of rolling stock.

The discussion as to the relative merits of different wheels, from the standpoints of safety and cost, is often animated, and is at best a much vexed one. Cast-iron wheels are commonly used in freight service. Until recently they have not been used on passenger cars or locomotives, the steel-tired wheel having been employed almost exclusively in those services Such important advances have, however, been made in the manufacture of the chilled cast-iron wheel that it is now considered safe to use them under passenger cars, and on a good many roads the more costly steel-tired wheel is being thus replaced. Up to a comparatively recent date the much greater safety of the steel-tired wheel was unquestioned; for that reason it very properly held undisputed possession of the wheel market for passenger cars. Very distinct advances in its manufacture have also been made, particularly in the security of the fastenings for the tire-retaining rings, so that the steel-tired wheel, always favorably regarded by conservative officials, is now safer and better made than ever before.

The improvements in the manufacture of the chilled cast-iron wheel have been considerable also, and that wheel now gives very satisfactory results, both in the length of mileage run and light breakages under very severe conditions of service. Ten or fifteen years ago it would have been considered hazardous to put the cast wheel in service in which it is now quite familiar. One reason for this limited use was that the quality of different makes of the cast wheel differed widely, on account of the prevailing competition in their manufacture, a competition from which the steel-tired wheel has been free to a considerable extent. The tests now demanded by progressive railroads are tending to correct this inequality or to decrease the chances of serious consequences. The use of the cast wheel has increased so rapidly that many railroads believe that steel-tired wheels will be used not long hence in special service only, and chilled cast iron wheels take their place in ordinary passenger service.

The question, however, is by no means a settled one. The facts which will determine it are being gradually gathered. The results obtained with cast wheels under 50-ton steel cars show them to be safe under surprisingly heavy loads. With the care now taken in their manufacture and the rigid tests to which they are subjected, they are making excellent records for safety and long life. With the relative safety between the two types of wheels thus becoming more uniformly fixed, the cost of the two types becomes a legitimate consideration to the railroads. On this point we are not permitted to doubt the greater economy of cast wheels. It may be assumed that a pair of steel-tired wheels will run 260,000 miles under a car, while a pair of cast wheels will run 60,000 miles before being worn out. The first cost of a pair of steel-tired wheels is about fifty dollars and of cast wheels ten dollars; but allowing for the cost of turning and re grinding to obtain the mileage named above, the cost of the steel tired wheel has been figured out as $82 and that of the several sets of cast wheels necessary to make the same mileage, $47—less the value of the old wheels as scrap, say $25.

With confidence once established in the cast wheel, this great difference in cost will be certain to be a determining factor in bringing about a still wider use of that type of wheel. But even its advocates do not recommend its use in all cases—under engine trucks, where it is absolutely essential to have wheels of the highest quality and strength, the steel wheel is likely to continue to be exclusively used. They are also admittedly the best wheel adapted to a service where, as on mountain roads or on lines with heavy grades, long and continuous application of the brakes is necessary, in which case the brake-shoes are liable to overheat the wheels. On very fast trains, where the high speeds require wheels of especially large diameter, of say 37 inches and over, the steel-tired wheel is not likely to give place to any other type, and many who, while advocating the cast wheel for ordinary service, believe that where the wheel is over 33 inches diameter it is advisable to use the steel-tired type.

IMPROVED METHODS IN USING EQUIPMENT.

Besides increasing the capacity of their rolling stock to a remarkable extent in the last dozen years, more than doubling the number of tons of freight that can be carried in a train-load, the railroads have learned to use the individual units of their equipment to much better advantage. One very important reform bearing on this question is the introduction of the tonnage-rating plan, the use of which in recent years has become quite general. It is only within the last half-dozen years that very much has been done toward doing away with the old and unsatisfactory system of loading engines by the number of cars. This method assigns a definite number of cars to be hauled by an engine, when they are available, without estimating what their total tonnage may amount to. If no care is taken to fully load cars, one may contain twenty tons, another five tons, and another may be loaded up to the limit of its capacity. One train, therefore, may be easily hauled and another, though consisting of the same number of cars and perhaps with a more powerful engine, will be stalled on the first heavy grade, or break in two on the road.

The tonnage-rating plan, which gives each engine a definite load, has largely overcome most of the difficulties of this nature.

Freight movement has been accelerated in various ways also. Bulk freight is usually held until enough has accumulated for a train-load, but a certain special traffic which is offered in light loads has to be moved promptly. Where this was formerly loaded in cars which made long trips, carrying but a small portion of their freight capacity, it is now loaded promiscuously into cars at shipping centres and forwarded under a plan which in some sense is an adaptation of a zone system in freight service. The cars, with their light loads, are forwarded by fast freight from the original shipping centres to important junction points and there re-loaded into cars arranged in proper station order, to be forwarded promptly in the regular trains for local distribution. The interests of the shipper and of the railroad company are thus equally served, for the former gets a quicker delivery for his goods, and the latter reduces the mileage of lightly-loaded cars to the minimum, gets the cars promptly returned for other freight, and thus secures a larger use for them and a better return for the capital invested in the equipment.

A good deal of attention has been given to the relocation of water and coaling stations, signals, etc., to place them at the points where trains can be stopped to the best advantage. The starting and stopping of the heavy trains now run is an important matter, for they may cause excessive damage to the track, and it is not an insignificant item of expense. Water tanks and other places where it is essential to stop trains have been sometimes located at the foot of heavy grades, or at other points where the loss of time in stopping and starting a train is excessive and may mean the burning of an extra ton of coal, all of which might be avoided by a more convenient location. Locomotive tenders are being made larger and larger to carry a more ample supply of water and coal so as to avoid as many stops as possible, and in many cases the coaling and water plants are moved at considerable expense, to locations where the cost and delays in starting and stopping and the wear on the machinery can be reduced.

Modern locomotives and other rolling stock represent a considerable investment, and it is desirable to keep them on the road, loaded to their limit, and earning interest on the capital invested in them. While this consideration tends in its way to increase the loads carried, it is necessary to carefully guard against the overloading of the engine. A good deal has been accomplished in this direction, but instances of excessively-loaded engines and consequent breakdowns are still more or less numerous. In a way the increase in size and equipment has perhaps tended to obscure the fact that there is a limit even to the capacity of modern equipment. The number of tons that a car may profitably carry is, of course, easily ascertainable by calculation and observation, but the power which can be exerted by a locomotive economically is subject to many variables which complicate the problem.

Motive power, driven beyond its true limit, may take up a load, but it is done at an unnecessary and profit-consuming expense. This is well recognized in marine service, where the wastefulness in power of engines worked to give the tremendous speeds demanded of the modern "ocean racers" has long been a typical instance of the undue cost of excessive speed. In railroad freight service the question of speed is not usually important enough to cause in itself undue strain on engines, but that result is brought about by excessive loading. Operating officials naturally desire to move as many tons of freight as possible with the engines assigned to them, but the proper and economical load is not the utmost that the locomotive will haul. The point beyond which the load and speed can be increased without an unprofitable consumption of fuel and an undue wear and tear on the machinery and boiler will be something less than the full capacity, and in this question the mechanical officers should have large powers of discretion.

THE MASTER CAR BUILDERS' COUPLER.

In a very little while all the freight cars on the railroads in this country will be equipped with the automatic vertical-plane coupler adopted by the M. C. B. Association about ten years ago. All new freight cars are so equipped, and the proportion of rolling stock still having the old fashioned couplings consists in the most part of cars which are so near the limit of their life that it would be unprofitable to make the sub-

stitution. The vertical-plane coupler has established a remarkable record in the matter of prompt acceptance by the railroads, considering the heavy cost to which it has put them. The air brake has similarly won its way into as general use as the coupler, these two great improvements in the safety of railroad operation being developed within about the same time, though the air brake has not had to overcome the opposition which long existed to a change from the old link and pin coupler. That opposition is by no means quieted. Though the M. C. B. coupler is practically the universal type of connection between railroad cars, the wisdom of its choice is still questioned in some quarters, and suggestions are frequently made, backed up by a good deal of active effort, to undo the work of the last ten years and devise some other form of coupling arrangement for cars.

It may be said at the beginning that such a course is altogether improbable. The majority of railroad men are still as staunch advocates as ever of the vertical-plane coupler. There is no question, however, that the advantages from the use of the M. C. B. coupler have not equaled the expectations of the railroads, held at the time of its introduction. It has not brought about the uniformity in car connections, the prospect of which was one of the most convincing arguments advanced to secure its adoption; and it has not done away with accidents to trainmen caused by going between the cars to lock or unlock the couplers. The failure to secure uniformity is directly due to the innumerable varieties of couplers used in interchange traffic, and this perhaps may be attributable to the too liberal attitude of the M. C. B. Association in regard to the manufacture of the coupler.

When the coupler was adopted certain limits of dimensions were formulated, known as contour lines, and the form was only limited by the restriction that all couplers must fall within these lines, so that though couplers might be of different makes or material, they would freely interchange. The result has been unfortunate. Upwards of one hundred different couplers are in more or less extended service, and this has caused a confusion about as bad as in the days of the old link-and-pin type. Though agreeing with the standard contour lines when new, very few of these couplers, when little worn, will lock with other types, and the worst of them will not couple with other couplers of similar manufacture. This destroys the automatic locking and unlocking features, which were the fundamental reasons advanced in favor of the adoption of the vertical-plane coupler, which, indeed, is commonly known as the automatic type.

Complaint also is made because of the necessity of carrying large stocks of repair parts for renewals and of weaknesses in design which result in broken knuckles, etc. The inconveniences to the railroads and the direct losses suffered by them from these conditions have been touched upon in a previous issue in the INVESTORS' SUPPLEMENT, and may be passed at present. But the failure of the coupler in its automatic features has been so general as to largely decrease its utility under existing conditions. Trainmen have still to go between the cars as in the old link-and-pin days to couple and release cars, and accidents from this source still continue to be recorded. As a safety appliance, therefore, there has been a large measure of failure. Besides all this, another source of accidents and expense has been introduced by the frequent unlocking of the couplers while trains are in motion. This causes the train to part in two, and the two sections are liable to collide with one another or with some other train. Damages to rolling stock from these break-in-twos are frequent and serious enough to cost the railroads a good deal.

It is also charged, though the testimony on this point is not so general as on the others mentioned, that the close coupling of the cars causes occasional derailments, by contributing to a dangerous rigidity of the cars on curves, while also bringing about an excessive wear of the rail and of the wheel flanges, which would be avoided by having more slack between cars as with the old link-and-pin coupler.

This is a rather formidable array of objections, enough it would seem to do away with any device. Such is not the case, however. Most of the objections set forth above are brought forward by those who regard the vertical plane as the best type of coupler. Indeed, those who do not consider it immensely superior to the link and pin, or any other suggested form of coupling, are very few. The dissatisfaction is not with the coupler but rather with the defective conditions which at present attend its use. With the great increase in the number of couplers, the M. C. B. lines of contour or dimensions have been departed from, and it is believed that strict adherence to these lines and more careful specifications would remove most of the complaints and bring about more reasonable conditions in practice, so that the objects sought by the adoption of the automatic coupler would be actually obtained. If the multitudinous varieties could be reduced to a dozen or so, the desired results would probably be realized without anything further being done. There is no hope of this being accomplished. The use of one or a limited number of standards could not be enforced so long as some manufacturer was ready to make couplers at a reduced price.

The whole matter was pretty thoroughly gone over at the recent convention of the Master Car Builders' Association, based upon an admirable committee report, whose recommendations were carefully framed to cover the weak points so far developed in the coupler question. They proposed to get rid of the weakness in design and in material by bringing about an agreement in the vital matter of contour lines and formulating specifications to govern railroads in the purchase of couplers. In this way it is hoped to get rid of weak and objectionable types. With the favorable action taken by the Association on the committee's proposals, confirmed later, as is necessary, by the approval of the individual railroads, of which there is no doubt, a long step will have been taken to bring order out of the chaos into which the coupler question has been allowed to fall. The M. C. B. standard dimensions are considered to be perfectly satisfactory, and there is no reason for changing them or for divergence from them in practice. The first point in improving the coupler situation, therefore, is insistence on the M. C. B. contour lines; then the careful fixing of the limit of wear allowable in couplers; providing a careful set of specifications which will be lived up to, and the keeping of the records of couplers in service, so that those types which make a bad exhibit in the matter of breakages or other defects will be gradually abandoned. We need not go into technical features of the report nor describe the means by which the committee proposed that the ends in view be reached.

The *Adjustment Mortgage* (**Abstract** V. 62, p. 739) is to the Central Trust Co. as trustee. Interest is payable only out of net earnings for the fiscal year up to 4 per cent and the rate is to be determined on or before October 15 in each year; interest is non-cumulative till July 1, 1900, and cumulative thereafter. Present issue is limited to $51,728,000, but when the $30,000,000 general 4s authorized for improvements as above have been issued (i. e., not before June 30, 1905), $20,000,000 additional adjustment 4s may be issued for the same purposes at not exceeding $2,000,000 in any one year, but only by a majority vote of the adjustment bondholders. *Interest*—In Nov., 1897, paid 3 p. c.; in Nov., '98, full 4 p. c. V. 68, p. 426.

San Francisco & San Joaquin bonds, see facts in that co's. statement.

GENERAL FINANCES.—The guarantee fund notes due Nov., 1898, were retired by issue of $10,596,000 general 4s, thereby obviating the necessity of issuing prior lien bonds. In July, 1898, $3,801,000 general mortgage bonds were listed, having been sold to reimburse the treasury for cash expenditures theretofore made. (V. 67, p. 123, 221.) In Mar., 1899, $2,699,000 additional gen. 4s, issued for improvements, were listed, making total listed to date $126,823,000.—V. 68, p. 579.

In December, 1898, the $2,474,800 capital stock of the San Francisco & San Joaquin Valley Ry. (which see) was purchased at par. The new road embraces about 384 miles of railway, and will be fully completed in 1899 from the proceeds of its stock and $6,000,000 bonds already sold. It will afford an independent connection with San Francisco. At present the San Fr. & S. J. is completed to Stockton and has connection with San Francisco by water. See V. 67, p. 817, 841, 1355. Atchison paid second dividend, 1¼ p. c., on preferred July 20, 1899. This payment was from the net earnings for 1898-9, which, it was stated, were sufficient to pay another semi-annual dividend of 1¼ per cent in Jan., 1900.—V. 68, p. 1131.

LEASED LINE BONDS.—The Baltimore Belt bonds deposited have been called by the company under the option reserved per agreement in V. 66, p. 1235, and will be purchased at par and interest (4-5 per cent) on Sept. 1, 1899, through Brown, Shipley & Co. in London, Brown Brothers in New York and Alex. Brown & Sons in Baltimore. Holders were offered the option till July 20 by the firms named of taking, instead of cash, B. & O. first mortgage 4s, $ for $.—V. 69, p. 25.

The Schuylkill River East Side bonds, per agreement in V. 68, p. 40, are treated as follows: The road is to be leased at a rental equivalent to interest at 5 per cent on the existing bonds, but the new company will have the right to purchase all the Schuylkill bonds at 110 and accrued interest at any time after Dec. 1, 1900, and prior to Dec. 1, 1903, on 30 days' notice. If not so purchased, the company will assume the ultimate payment when due of the principal of such bonds.

The Staten Island Rapid Transit property was sold under foreclosure in April, 1899, subject to the $1,000,000 first 6s, part of which were purchased for the B. & O. Under the agreement of Jan, 1899 (V. 68, p. 189), the $2,500,000 second mortgage 5s were to be exchanged for a like amount of new 4s to be issued by the reorganized Staten Island Co. These new 4s the B. & O. RR. agrees to purchase at par and interest in cash in 5 years, and in the meantime to guarantee interest thereon at 4 per cent. V. 68, p. 189, 333, 525.

As to West Virginia & Pittsburg bonds, the agreement in V. 67, p. 1310, provides for a lease to the reorganized B. & O. to begin not later than April 1, 1899, for a sum equal to 4 per cent on the mortgage, to be appropriated to payment of bond interest, the B. & O. to have the option for 5 years from April 1, 1899, to purchase the bonds at par and accrued interest on 60 days' notice. Most of the bonds assented.

REORGANIZATION OF BRANCHES. The depositories are the Mercantile Trust Co. in this city and the London & Westminster Bank, limited, in London. Plan in V. 67, p. 688, covers various leased lines, and that in V. 67, p. 1261, 1262, the Baltimore & Ohio Southwestern System. They provide that the company shall create:

Of which to be issued only at the rate of not exceeding $1,000,000 per year for the first two years and thereafter at the rate of not exceeding $500,000 per year, for the enlargement, betterment or extension of the properties covered by the first mortgage	*5,000,000*

* Interest at the rate provided in the old bonds from the date of the last matured coupon next preceding January 1, 1899, up to the date when the new bonds begin to bear interest, namely, January 1, 1899, excepting in respect of bonds represented by certificates of deposit stamped "Ex-interest due January 1, 1899." Plan is now effective; over 85 per cent of securities deposited.

GENERAL FINANCES.—The large decrease in net earnings for the year 1898-9, it is explained, is caused by the fact that the receivers in settling their accounts have charged against the revenue of the year large sums ordinarily extending over a much longer period, and also by the large amounts put into the property and charged to operating expenses. See official statement, V. 68, p. 1224. As to physical rehabilitation under the receivership, see official statement, V. 69, p. 128.

In addition to the $49,975,000 first mortgage g., 4s issued in June, 1899, for reorganization purposes, $1,500,000 additional of said bonds, being part of the $7,000,000 reserved for corporate purposes, were used for the purpose of providing funds for the purchase of equipment and for other improvements to the mortgaged premises.

The purchase in July, 1899, of $2,052,000 of the total issue of $3,500,000 Pitts. & West. 2nd. mortgage bonds, in addition to its former holdings, will insure the reorganization of the property in the interest of the B. & O. V. 69, p. 132.

POSITION OF NEW COMPANY, INCLUDING CENTRAL OHIO SYSTEM, BALTIMORE & OHIO SOUTHWESTERN, ETC. (See V. 69, p. 31.)

Estimated net income on basis of year end. June 30, 1898, (including $1,989,261 from B. & O. S. W.)	$10,285,694
Deduct interest on $70,000,000 prior lien 3½ per cents	$2,450,000
$15,000,000 Pittsburg Junc. & Middle Divis. 3½ per cents.	525,000
$40,000,000 Southwestern Div. 1st 3½ per cents	1,400.000
$50,000,000 first mortgage 4 per cents	2,000,000
Estimated rentals, including Belt Line	500,000
Taxes (if foreclosure is necessary the taxes may increase).	544,794
Taxes B. & O. Southwestern system	293,998
Terminals	202,000
Ground rents and mortgage interest	75,000
Total charges of new company	$7,990,792
Balance surplus [equal to 4 7/8p. c. on preferred stock]	$2,294,902

"The fixed charges will thus be well within the past net income of the property—even that of the last fiscal year of extreme depression. The new company will be relieved from floating debt and the embarrasment of car and wheelage trust payments, and will start with substantial working capital." The following is also given:

Apart from the large amount provided in the plan dated June 22, 1898, to be expended on the B. & O. RR. properties, the plan for the reorganization of the Central Ohio RR. system provides $3,000,000 to be expended on the properties comprised therein and for additional equipment; and the B. & O. Southwestern plan provides $5,500,000 to be expended in like manner on the Baltimore & Ohio Southwestern System. The above statement of earnings does not allow for any increase in earnings from these expenditures, which, it is confidently expected, should largely increase the surplus over fixed charges.

ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from January 1, 1883, providing for the payment to Canada Southern of one-third the joint income over all fixed charges. The contract provided for a re-apportionment every five years, and in December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

HISTORY, &C.—The former Chesapeake & Ohio was sold in foreclosure April 2, 1878, and this company organized. In 1888, under the direction of Drexel, Morgan & Co., reorganized without foreclosure, and the road extended to Cincinnati. The consolidation with the Richmond & Alleghany was consummated in January, 1890. The Elizabethtown Lexington & Big Sandy and other roads were absorbed in 1892. In September, 1893, the Chesapeake & Ohio Steamship Co., controlled by this company, began operations. See below and V. 55, p. 1078.

CAPITAL STOCK.—Common stock is $60,498,100; increased from $45,000,000 to this figure since 1892 through exchange of practically all the $25,000,000 of preferred stocks for common stock and general mortgage 4½ per cents in certain proportions. *First preferred* for $23,300 and *second preferred* for $26,000 only was outstanding July 1, 1898. See terms of exchange in V. 54, p. 642.

BONDS.—The *series A bonds of* 1878 cover, subject to the *purchase money 6s*, the main line from Richmond, Va., via Charlottesville to Ashland, Ky., 428 miles, and are equally secured with the *Peninsular Extension 6s* by first mortgage on extension to Newport News, 75 miles.

The *consolidated mortgage* due in 1939 is for $30,000,000 (trustee, Central Trust Company), and sufficient bonds are reserved to provide for prior liens. This mortgage is also secured by deposit in trust of the $11,000,000 bonds and two-thirds of the stock of the Maysville & Big Sandy RR., [on road Ashland to Covington, Ky.], and of the Bridge to Cincinnati, all owned by Ches. & O. (Abstract, V. 49, p. 147.)

Richmond & Allegheny Division bonds cover the low-grade freight route from Richmond via Lynchburg to Clifton Forge and branches. (Mort. abstracts, V. 51, p. 144.)

The *general mortgage of* 1892 (Central Trust Co. and H. T. Wickham trustees) is for $70,000,000, but additional amounts at $25,000 per mile may be issued for double-tracking. Of the $70,000,000 as above, $32,691,000 bonds were reserved to provide for the $30,000,000 consols of 1889, issued or to be issued, etc. The balance unissued may be sold for new acquisitions, rolling stock, etc., but not more than $2,000,000 thereof in any one year. The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. In March, 1899, $24,050,000 had been listed on New York Stock Exchange.

The *Elizabeth'n Lexington & Big Sandy* first mortgage bonds, interest on which has been reduced to 5 per cent, have been endorsed with the C. & O. guaranty of principal and interest, and general mortgage bonds have been set aside to retire them at maturity.

The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. Bridge Co.

OPERATIONS, FINANCES, &C.—Since the reorganization in 1888, when the control of the company was placed for five years in the hands of trustees, the property has been greatly enlarged and improved. This is one of the so-called Morgan-Vanderbilt lines.

The interest charges for the fiscal year 1898-99 are estimated at $3,130,121, against $3,148,172 in 1897-98. V. 67, p. 322. In Jan., 1898, $1,590,000 4½s were sold at a price sufficient to pay off all loans and accounts and provide a cash surplus for working capital.

The steamship line was formally opened Sept. 7, 1893, and owns six new steamers, using the railroad wharves at Newport News.

EARNINGS.—11 months, July 1 to May 31. 1898-9. Gross, $10,923,864; net, $3,540,307. 1897-8. Gross, 10,787,579; net, 3,472,437.

R. unguaranteed preferred at $29 50 per share and the common at $10 per share. V. 59, p. 1057. Unguaranteed preferred stock is $1,010,000 and common $2,312,700, neither of which have ever paid dividends. In Dec., 1898, all but 247 shares of unguaranteed preferred and 445 shares of common stock had been purchased by Chicago & Alton.

In 1877 leased in perpetuity of the *Mississippi River Bridge* at 7 p. c. on $300,000 stock (all owned by C. & A.) and 6 p. c. on bonds, and in 1895 took quit-claim deed of the property. V. 59, p. 423; V. 61, p. 324.

GENERAL FINANCES.—In Apr., 1899, a syndicate composed of Geo. Gould, J. H. Schiff, E. H. Harriman and James Stillman had acquired over 95 per cent of the preferred and common stocks, paying therefor $200 and $1 5 per share respectively. V. 68, p. 230, 281, 379, 427, 523, 670. See official circular in V. 68, p. 281. The syndicate in May, 1899, also acquired control of the St. Louis Peoria & Northern (St. Louis & Northern Short Line), thus removing the danger of a new parallel line between Chicago & St. Louis. V. 68, p. 1022. See also p. 1225. Of the Short Line, it is expected the portion from Springfield to Peoria, 63 miles, will be merged in the Alton system, which also assumed the lease of the Chicago Terminal Transfer terminal facilities at Chicago under a modified rental. V. 69, p. 26; V. 68, p. 1022, 1225.

The stockholders will vote Sept. 7, 1899, to authorize a mortgage to the Illinois Trust & Savings Bank as trustee, securing $40,000,000 50-year 3 per cent gold bonds, dated Oct. 1, 1899, to be used to refund bonds marked "¶" above maturing during next four years, and also provide fund for improvements and extensions, with power to issue additional bonds under said mortgage by vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1 000,000 per annum from Jan. 1, 1900. Stockholders were offered the right to subscribe to July 31, 1899, for the $40,000,000 new bonds at the rate of $650 cash for each $1,000 face value. See official circular in V. 69, p. 178; also p. 26, 129.

ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. In 1880 the Burlington & Missouri in Nebraska was absorbed. The leased lines are practically owned and there is no charge for rentals in the income account, except as interest on bonds. The Chicago Burlington & Northern and various other subsidiary lines situated in Illinois were merged in C. B. & Q. in May, 1899. V. 68, p. 975.

In June, 1899, contracts had been let for a portion of the extension of the Burlington & Missouri River from Alliance, Neb., south about 160 miles to Brush, Col. V. 69, p. 26; V. 68, p. 975.

Extension was also proposed from Oskaloosa west about 15 miles to the Des Moines & Albia division, near Hardy, thus giving the company a second line between Des Moines and Burlington. V. 68, p. 1224.

LANDS.—Only 47,669 acres remained unsold June 30, 1898; land notes outstanding, including interest payable, $239,465.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Jan. 1, 1898, to July, 1899, $11,752,000 stock was issued to retire an equal amount of convertible debentures, making total stock $93,730,200, and leaving still outstanding $3,511,900 convertible bonds. In April, 1899, $4,041,500 additional stock was offered for subscription at par. This stock is entitled to dividends from Sept. 8, 1899, and will increase the outstanding issue to $97,796,300. See "General Finances" below.

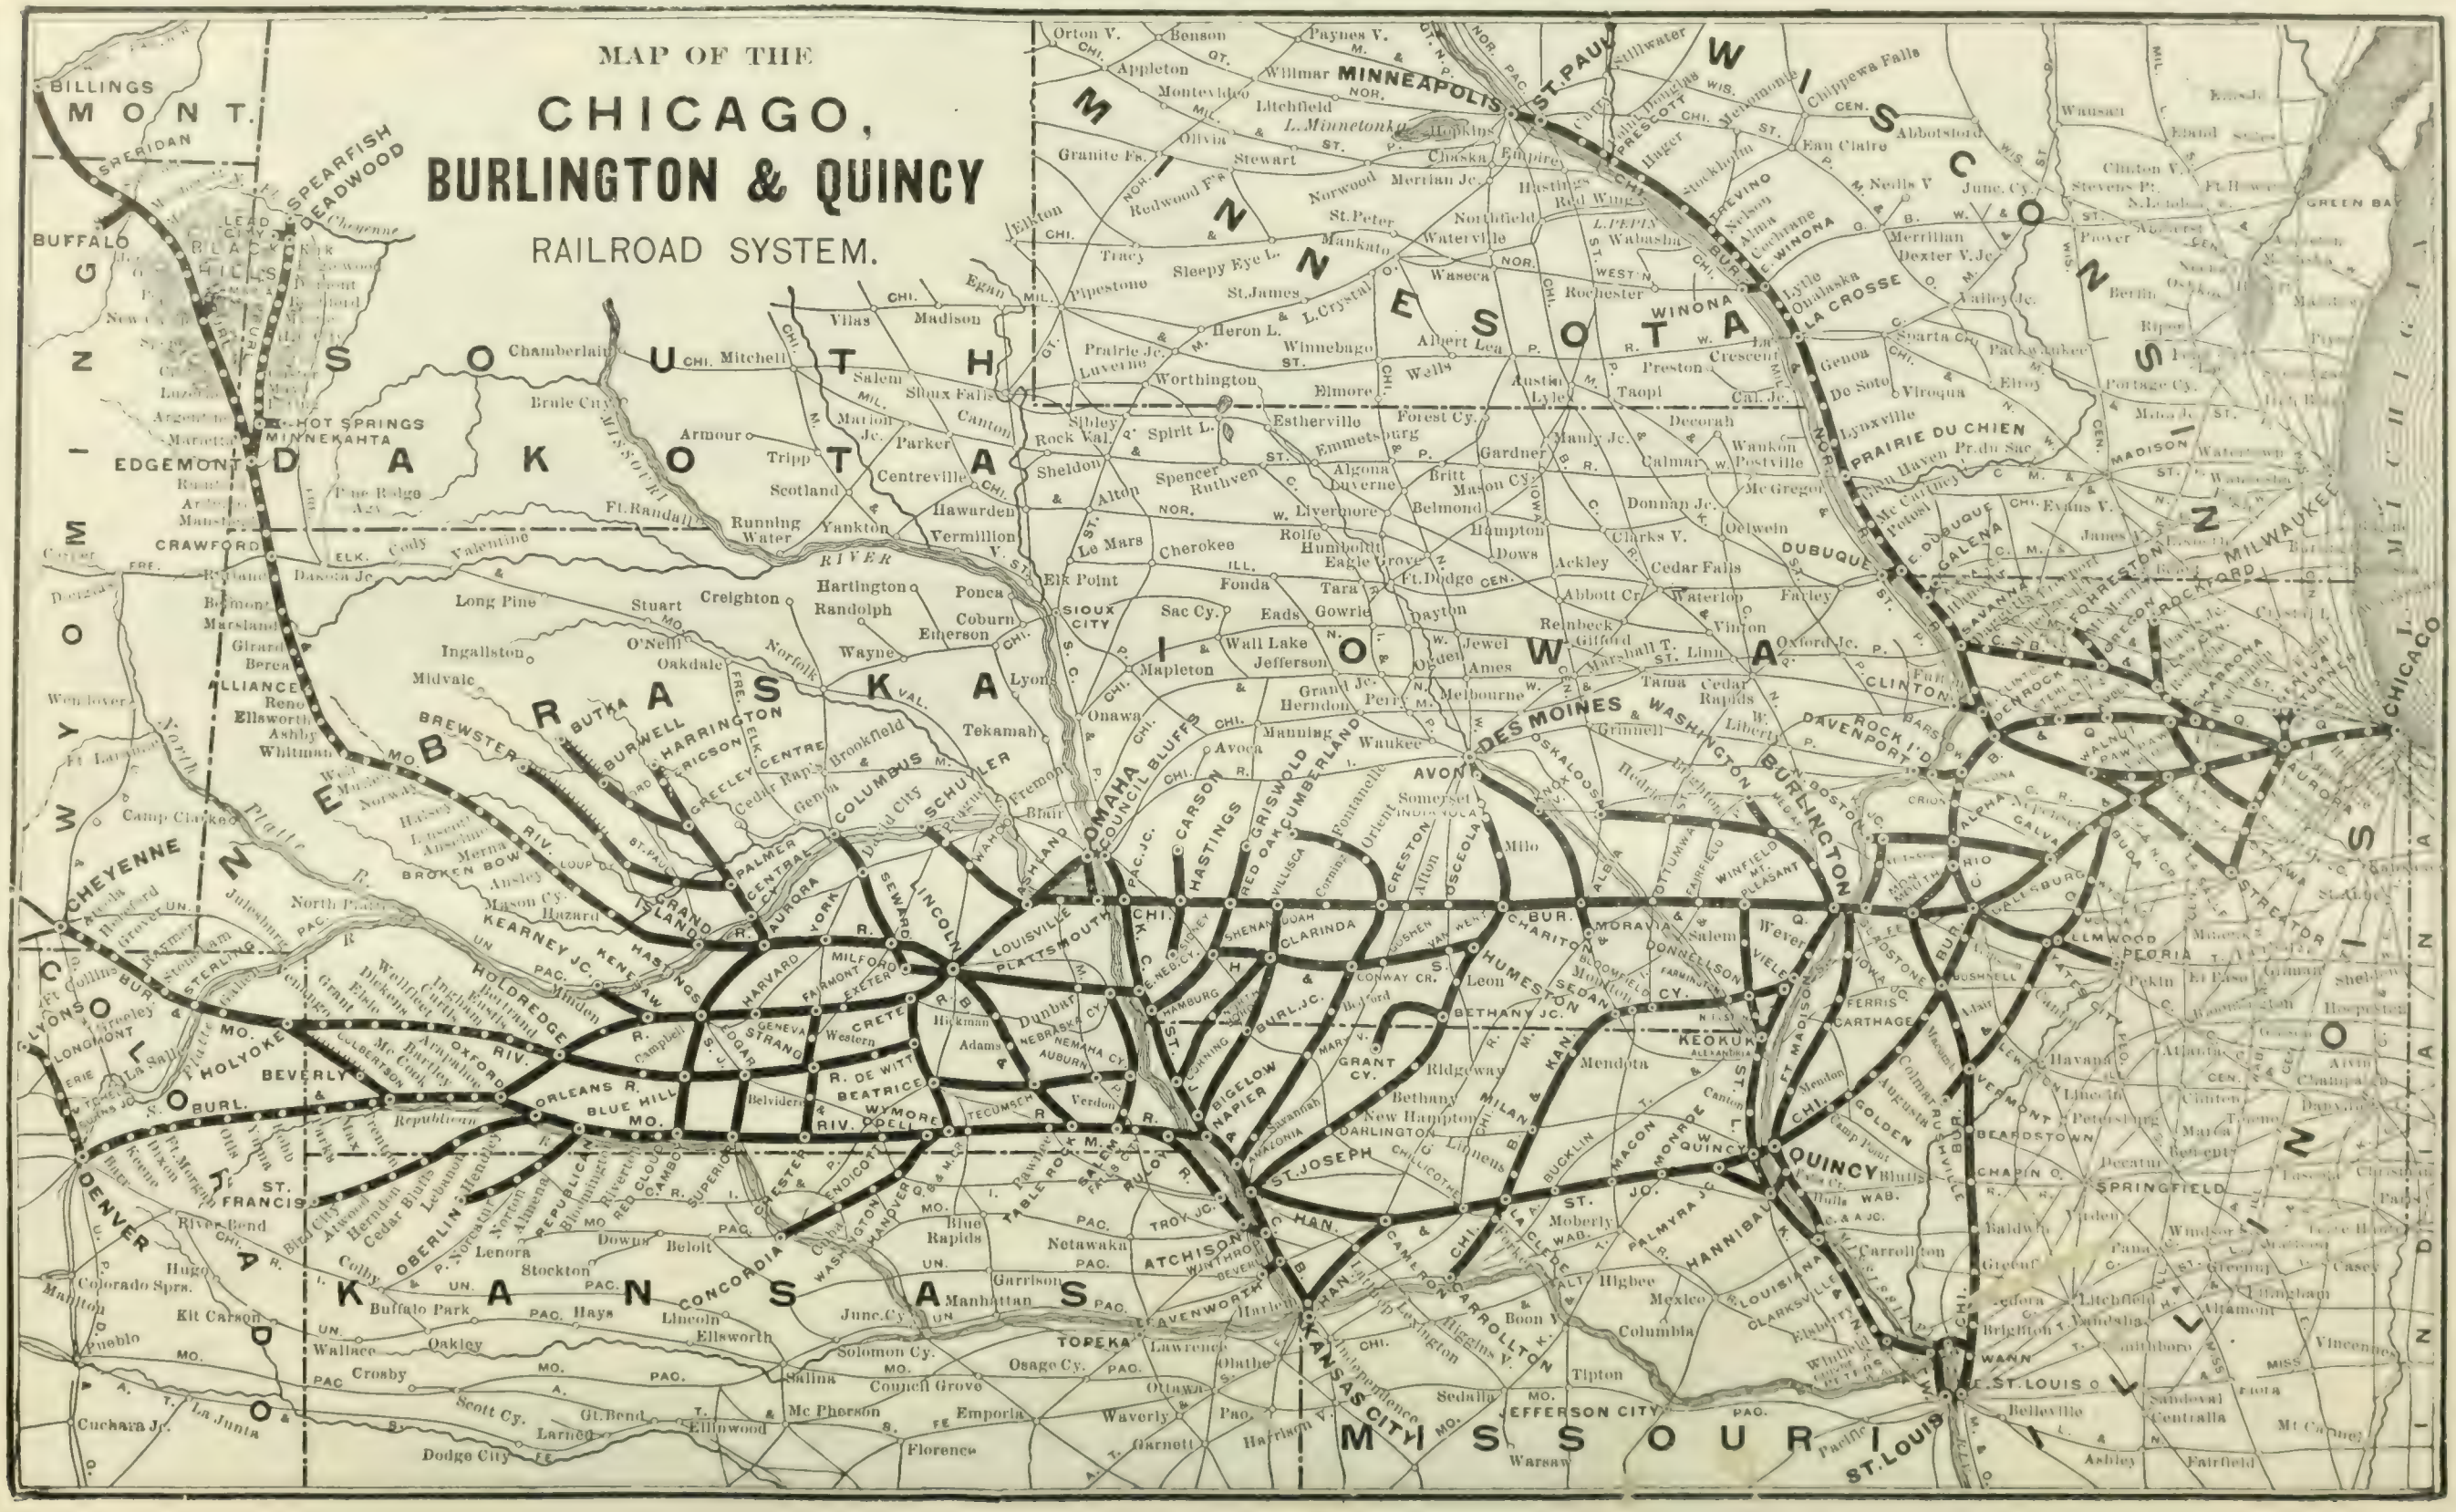
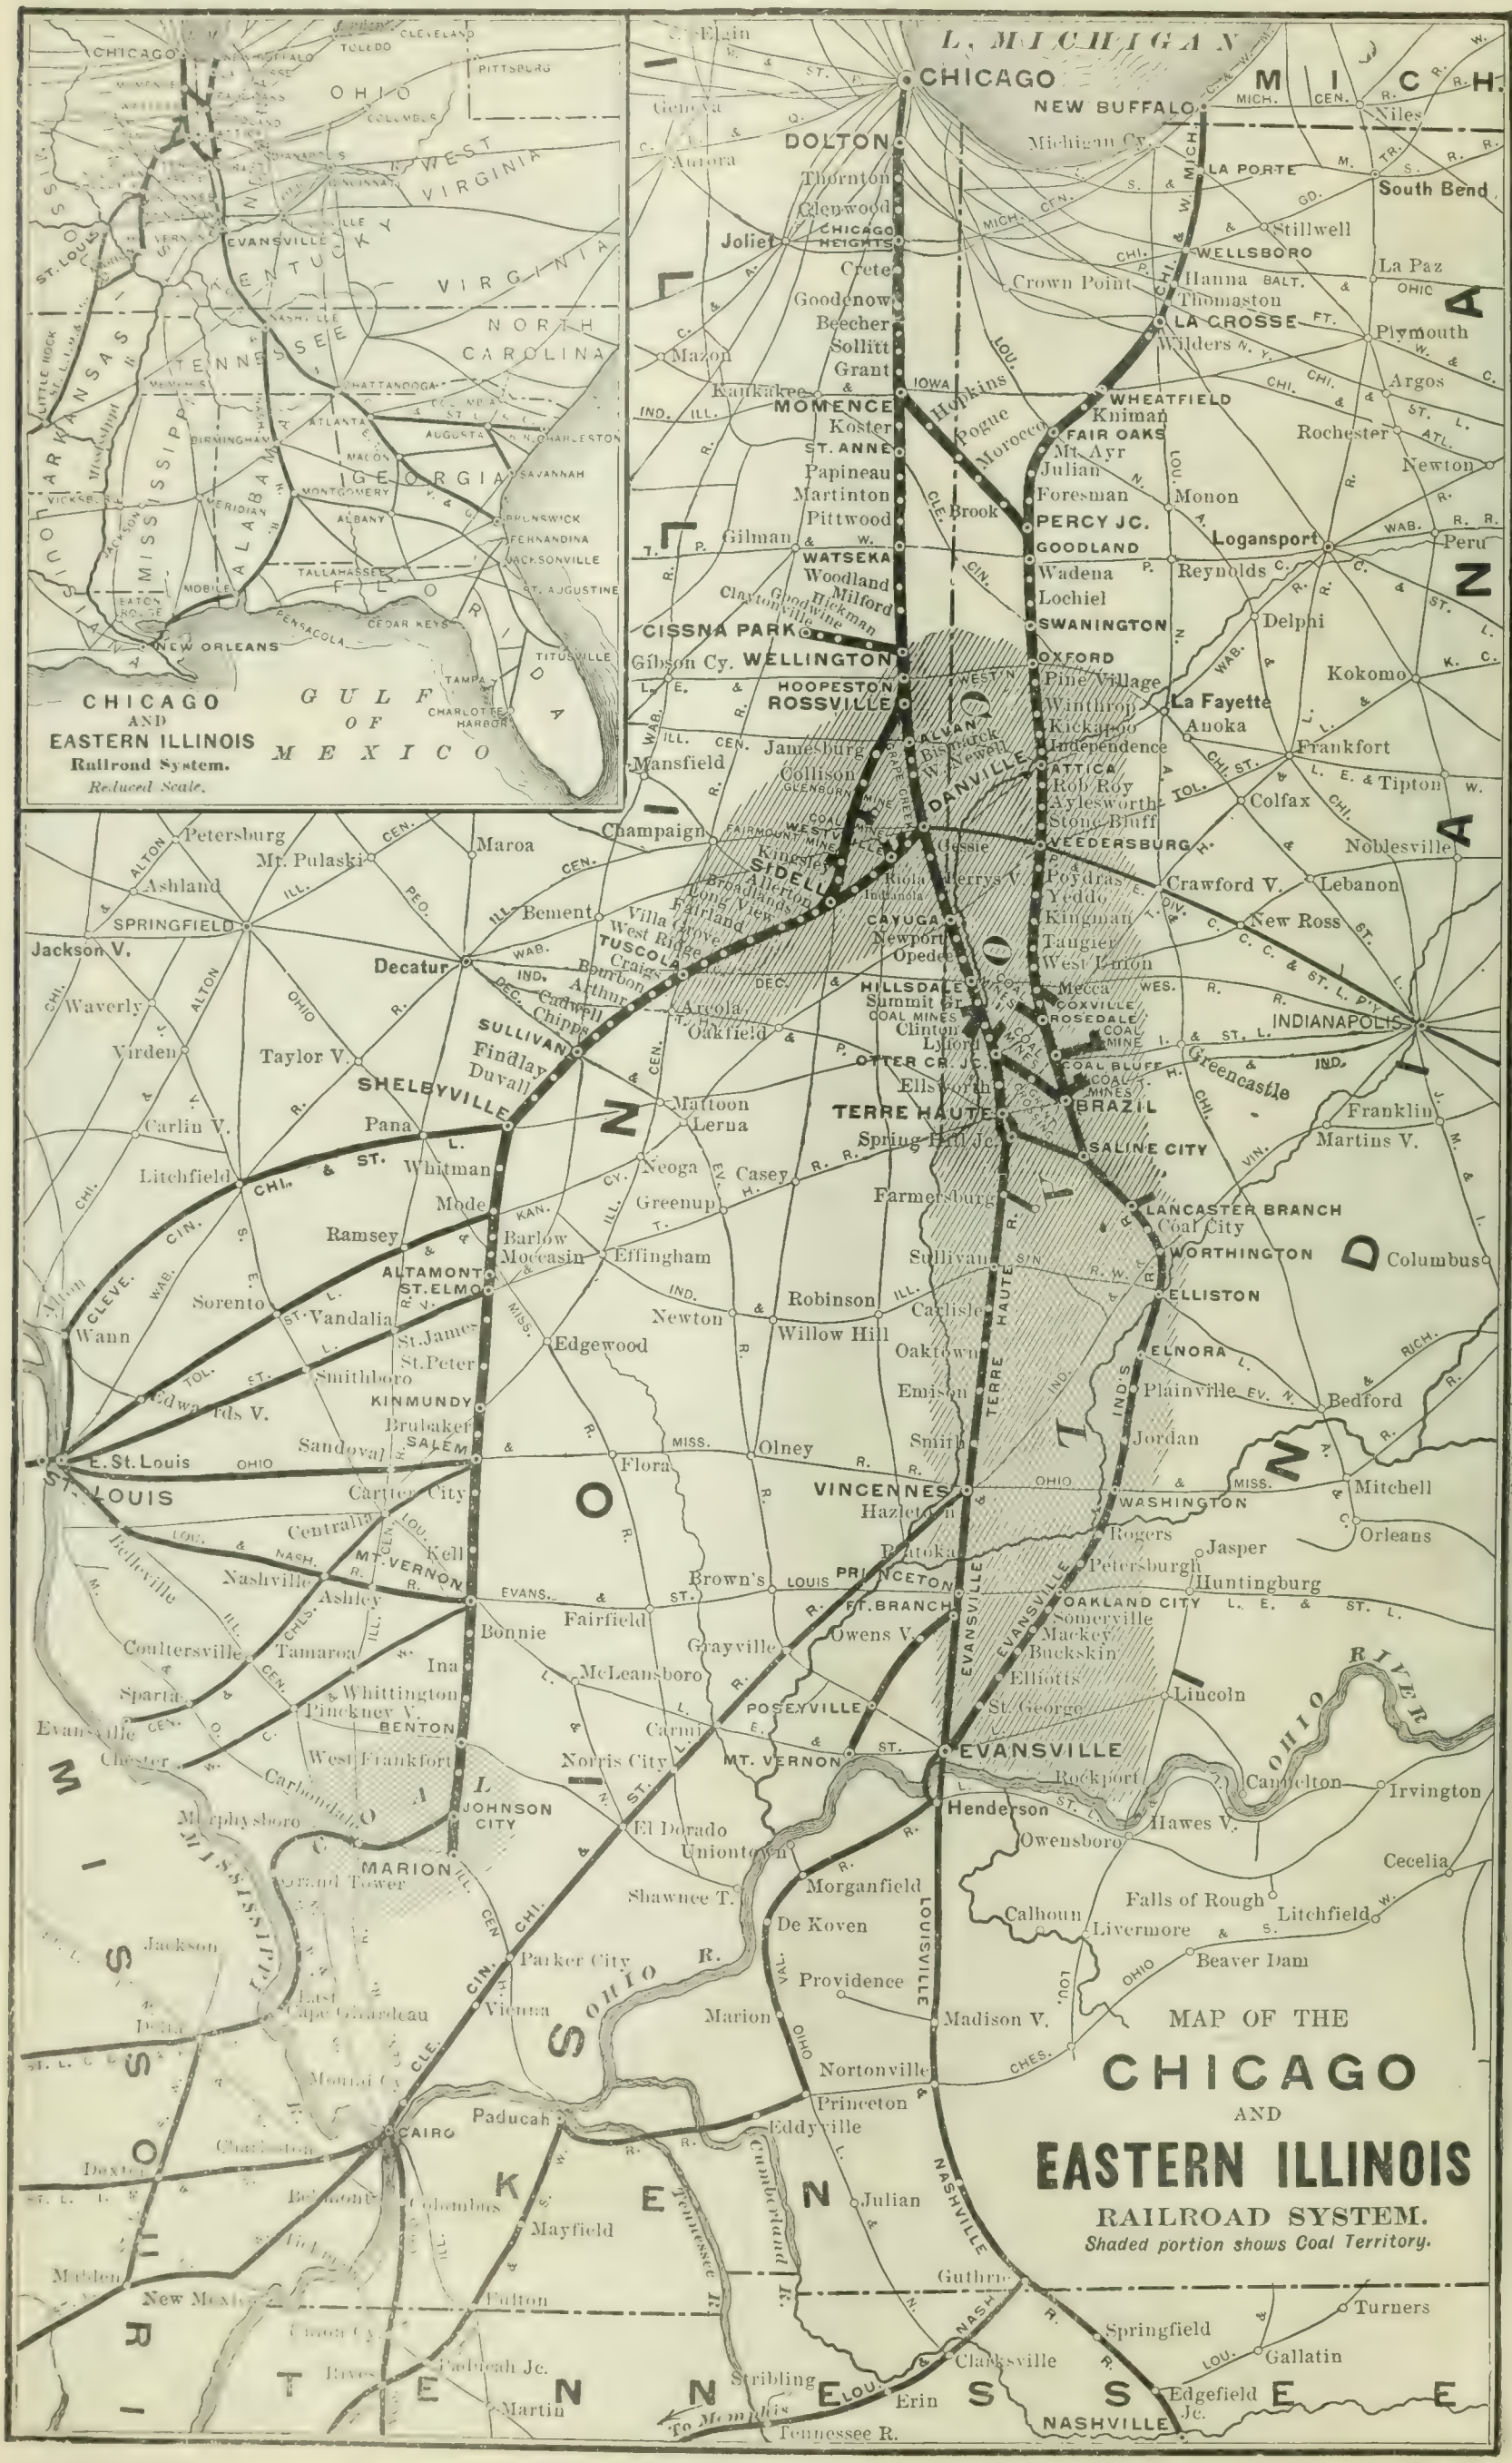
SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.

The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest on any coupon day after thirty years. The issue is limited to $35,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River (including the Chicago Burlington & Northern and other lines to be merged), upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and an additional $16,166,000 were issued in 1899 (with $4,041,500 stock) as below stated, to retire Chic. Burl. & Nor., etc., bonds, aggregating $13,787,500 and costing $14,235,575 and to pay for improvements, etc. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771.



The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which Jan. 1, 1897, there were 88 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)



Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1898, of the bonds given above a outstanding: Of **g**, $4,583,000 July 1, 1898; **h**, $1,924,000; **k**, $327,000. Also canceled bonds not included above, **f**, $3,331,000, July, '98.

The collateral trust *Nebraska extension* bonds of 1887 (New England Trust Co., of Mass., trustee) are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $231,200 having been retired in 1896. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $11,688,100 had been thus converted up to May 5, 1899. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

Many of the bonds are redeemable (may be drawn) before maturity at various prices, plus accrued interest, as stated in the table above.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In March, 1899, a controlling interest in the Keokuk & Western RR. (which see) had been acquired, settlement to be made about May 1.

In April, 1899, stockholders of record May 5 were offered the right to subscribe pro rata till May 31 for $16,166,000 new 3½ per cent bonds at 75, and $4,041,500 capital stock at par, in blocks of $1,000 bonds and $250 stock, for which $1,000 is to be paid, $500 on June 8 and $500 on Sept. 8. This issue of 3½ per cent bonds is limited to $85,000,000, as above stated, and is designed to retire eventually the bonded indebtedness of all the lines east of the Mississippi River. The lien will become an absolute first mortgage on payment of the consol. 7s and the Chicago & Iowa division 5s. The present issue is made to take up the bonds of Chicago Burlington & Northern RR. and $1,071,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds begins July 1, 1899. See circular V. 668, p. 771. The C. B. & N. was merged in May, 1899.

The company's sinking funds have received to June 30, 1898 over $18,000,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1897-8 the aggregate sinking fund income was $1,344,382, of which $778,612 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

Debentures aggregating $31,910,900 have been issued; of this amount $9,000,000 was used to purchase the Hannibal & St. Joseph, from which a good income is received, while $7,647,000 was used to buy other stocks and $15,263,900 for improvements, etc.

As unencumbered assets, on the other hand, the company owns besides the $14,244,900 Hannibal & St. Joseph stock above mentioned, a large amount of stocks and bonds, a list of the same being in V. 63 on pages 778 and 877. The road owned unbonded and the roads whose bonds are all owned were in 1898, as follows:

	Miles.
Northerly Extension, Alliance, Neb., to Billings, Mont., and branches	621
St. Louis Keokuk & N. W. (all its $15,593,800 bonds and stock owned and unpledged Keokuk, Ia., to St. Louis, Mo. (Net earnings in 1894-95, $691,026)	226
Other lines of moderate earning capacity (Ch. Burl. & K. C., etc.) securities all or nearly all owned and unpledged	477

An article covering fully the above points was in V. 63, p. 775.

In March, 1897, the Chicago Paducah & Memphis, 100 miles, was purchased, and a connection from Shelbyville to Altamont, 25 miles, built. (V. 64, p. 516.)

On Jan. 30, 1899, the Eastern Illinois & Missouri River RR. was incorporated as an extension of the St. Elmo Division from Marion, Ill., to Cape Girardeau, about 50 miles, to connect with the St. Louis Southwestern and also with the Mobile & Ohio. V. 68, p 231. On June 7, 1899, the stockholders voted to purchase the property. V. 68, p. 771. In July, 1899, track-laying was reported in progress.

In 1897 the total issue of gen. consol. bonds was limited to $30,000,000 and bonds were reserved for Chicago & Indiana Coal firsts. See V. 64, p. 1088. The gen. consols are a *first* mortgage on 256 miles of road, including the line from Rossville via Sidell to Altamont, etc.; also on equipment valued at $2,657,000, and upon real estate in Chicago costing over $1,200,000. In Sept. 1898, the Chicago Gt. West. was surveying a preliminary line from Hampton, Ia., to Omaha, Neb. V. 67, p. 481. See also V. 67, p. 1308.

HISTORY.—The Chicago St. Paul & Kansas City was organized in May, 1886, and in December, 1887, merged with Minnesota & Northwestern. In August, 1892, reorganized per plan, Vol. 55, p. 856. Each $1,000 of Minn. & N. W. and Chi. St. P. & K. C. first mort. bonds was given $500 debenture stock and $600 pref. "A" stock.

On Sept. 7, 1893, the Chicago Great Western Co. having thus become the owner of over 97 per cent of the 1st mortgage bonds and over 99 per cent of the general mortgage bonds, acquired by deed the title of the Chicago St. Paul & Kansas City Ry. (815·67 miles), subject to the mortgages, the bonds which it owns being kept alive. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

SECURITIES.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock and of the trust deed were fully set forth in the editorial article of the SUPPLEMENT for October, 1897.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000. The purpose is to devote the proceeds "to redeem at the discretion of the finance committee from time to time, as opportunity offers at or before maturity, any or all of the liabilities of the company which are a charge prior to the 4 p. c. debenture stock," and for improvements.—V. 66, p. 133, 663, 1088.

On New York Stock Exchange in January, 1899, $13,308,000 debenture stock had been listed. Cash interest will be resumed on all the debenture stock and *all* the preferred "A" will be entitled to cash dividends after July 1, 1899.—V. 67, p. 1206.

DIVIDENDS.—First semi-annual dividend, 2 p. c., on preferred paid Jan. 31, 1899; in July, 1899, 2 p. c.

GENERAL FINANCES.—The company has been spending a considerable sum for the reduction of grades, etc., $2,119,000 from sale of sterling notes and an additional sum from earnings was being so applied in 1896-98, and $182,000 for ballasting, etc., from other sources. V. 66, p. 235, 283. The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund in the near future the following securities: Ch. St. Paul & K. C. 5s, subject to call at 105, $2,823,150; equipment lease warrants, $1,673,000; sterling loan 6s, $1,454,000; gold notes 5s, $1,100,000, and for improvements. V. 68, 186. Of this new stock, $3,300,000 has been arranged to be sold to retire the $2,823,150 priority loan (the only mortgage debt), to be called and paid Jan. 1, 1900, and no more will probably be issued until 1901, when certain car trusts mature. V. 68, p. 669, 1131.

The main line of the Wis. Minn. & Pac., extending from Red Wing, Minn., to Mankato, 93·7 miles, purchased from the Chic. R. I. & Pac. has been operated since June 1, 1899. V. 68, p. 976.

HISTORY, &C.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In 1899, all the stock and bonds of the Des Moines Nor. & West, 149 miles, were acquired, the C. M. & St. P. taking possession July 1, 1899.—V. 68, p. 40, 975. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1899, $15,557,000 prior lien bonds outstanding were exchangeable for preferred.

BONDS.—Abstracts of some of the older mortgages were published in the CHRONICLE, V. 45, pp. 85, 114, 144, 212, and V. 48, p. 830.

The following bonds are *convertible into preferred stock* at any time within ten days after a dividend shall have been declared and become payable on the preferred: Iowa & Dakota Extension 7s, River Division 7s, Chicago & Milwaukee 7s of 1903, Hasting & Dakota 7s of 1903 and Ch. Mil. & St. P. consols of 1875. The consols of 1874 also are convertible into preferred within 15 days after dividend day. The convertible bonds were fully described in SUPPLEMENT for Mar. '93, p. 2.

Chicago & Pacific Western Division 1st 5s were issued at $20,000 per mile for road, with additional amounts for equipment and bridges; no further bonds can be issued. The mortgage covers the following miles of road: Farley, Ia., to Kansas City, Mo., 341 miles; Marion, Ia., to Council Bluffs, Ia., 262 miles; Astor, Ia., to Aberdeen, North Dak., 352 miles; branches 162 miles; total, 1,117 miles.

Terminal five per cent bonds of 1884 cover terminal property of several hundred acres in Chicago and Milwaukee.

The *general mortgage* of 1889 (see **abstract** in V. 48, p. 830) is for $150,000,000, to the United States Trust Co., of New York, as trustee, and covers the entire railway property and franchises of the company (therein described) subject to prior liens as below mentioned. The prior lien bonds cannot be extended, but will be paid off at maturity.

On June 30, 1898, the following amounts of general mortgage bonds had been issued or were reserved for the purpose indicated, viz:—

Listed on New York Stock Exchange	$23,676,000
In treasury of the company (unsold)	5,498,000
Total reported by the company as outstanding	$29,174,000
Reserved for prior liens	100,168,500
Originally reserved for prior liens, which have since been converted into pref. stock. Will eventually become available for improvements. (See also below)	13,232,500
Available for improvements, etc. (see also below)	7,425,000
Total authorized	$150,000,000

The $29,174,000 outstanding include $6,000,000 issued to pay for 178 miles of sundry small branches on which the general mortgage is a first lien, and to retire the $2,500,000 first mortgage bonds of Chicago Evanston & Lake Superior Ry., a Chicago suburban road, also $4,035,000 issued to replace prior bonds paid and canceled.

The $7,425,000 "available for improvements, etc.," of bonds above mentioned are applicable for premiums paid in retiring or refunding convertible and other prior lien bonds bearing a higher rate of interest than 4 p. c., for cost of branches, second and side tracks, real estate, bridges, rolling stock, equipment, etc. On July 1, 1898, of the prior lien bonds outstanding, $19,552,000 (maturing 1899-1908) were convertible into preferred stock; if from time to time so converted they will set free a like amount of general 4s which, with the $13,232,500 reserved against bonds already converted, will become available for improvements, additions, etc., as soon as the balance ($7,425,000) of the amount originally reserved for improvements has been so expended. V. 48, p. 830; V. 50, p. 205. N. Y. Stock Exchange to Jan., 1899, had listed $23,676,000 generals—see "General Finances," V. 65, p. 462, and V. 66, p. 335.

In Jan., 1899, $2,500,000 of the $5,498,000 general mortgage bonds in the treasury on June 30, 1898, were sold, the bonds bearing 3½ per cent interest and being known as Series B.—V. 68, p. 129, 523.

HISTORY, &C.—The Chicago & North Western Railway was organized in 1859, and has since absorbed many other roads.

In December, 1882, a controlling interest was acquired in the stock of the Chicago St. Paul Minneapolis & Omaha Co., which see.

In July, 1884, the capital stocks (except a few shares) of the Fremont Elkhorn & Mo. Valley and the Sioux City & Pacific were acquired on the terms stated in the SUPPLEMENT of June, 1885, and prior issues. Their securities, except those held by Chic. & N. W., are in table above.

In December, 1891, the Milwaukee Lake Shore & Western RR. was bought by an exchange of stock. See V. 57, p. 375; V, 56, p. 792.

CAPITAL STOCK.—Of the common stock $2,333,688, and *preferred* $3,795 remained in the co's treasury in June, 1898. Pref. stock has a prior right to 7 p. c.; then common 7 p. c.; then preferred 3 per cent; then common 3 per cent; then both classes share.

The first issue of $20,000,000, bearing 3½ per cent (reg. interest Q.—F., coupon M.&N.), has been sold to Kuhn, Loeb & Co., of N. Y.—see "general finances" below and V. 65, p. 69, 111, 571. The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in SUPPLEMENT of May, 1894. See description of all the debentures on page 2, SUPPLEMENT of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced to present figures by sinking fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elk Horn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the Wy. Cent. having been consolidated with F. E. & M. V.], etc. To July, 1899, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, May 1, 1899, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock. The extension and improvement mortgage sinking fund commences in 1893, and will receive not less than $25,000 yearly; these bonds are not subject to call.

LAND GRANT.—The report for 1897-98 showed that the total consideration for the lands and lots sold in that year amounted to $225,596. Net cash receipts were $455,357. The statement of amounts secured to be paid to the company by outstanding contracts of sale in force at the end of the fiscal year showed a total of $772,371. The lands unsold and uncontracted for May 31, 1898, were 678,199 acres.

GENERAL FINANCES.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. Maple River first 7s for $402,500 fell due July 1, 1897.

In 1897-98 the average freight train load was 194 tons, against 151½ tons in 1896-7; rate per ton mile, 0·89 of a cent. In calendar year 1896 of 15,772,642 tons of freight carried, grain furnished 12·73 p. c., coal 12·61 p. c., ores 22·31 p. c. and lumber 6½ p. c.

EARNINGS.—Jan. 1 to May 31, 1899 (5 months), gross, $14,864,069, against $13,998,772 in 1898. Advance report for 1898-9 was in V. 68, p. 1072, showing the following:

Years.	*Gross.*	*Net.*	*Charges (net).*	*Dividends.*	*Bal., sur.*
1898..	$37,933,299	$13,171,946	$8,629,263	$3,523,270	$3,619,413
1897..	36,050,561	12,304,076	6,548,930	3,519,823	2,235,323

The above surplus does not include land income. A large proportion of the surplus for the year has been expended on construction and track elevation in the City of Chicago.

ANNUAL REPORT.—Fiscal year ends May 31. The annual meeting is held the first Thursday in June. The report for 1897-98 was given at length in V. 67, p. 219, 224, 315. See also editorial, p. 203.

HISTORY.—On Dec. 1, 1895, succeeded to the property of the old New York Lake Erie & Western RR. Company, sold in foreclosure on Nov. 6 under its second consolidated mortgage. The new company holds in fee or through ownership of all or practically all the stock of the independent companies, the line from New York to Chicago (including the Nypano RR. and Chicago & Erie companies) and also all branch and subsidiary lines except a few small properties aggregating about 300 miles held under lease. The reorganization **plan** of August, 1895, was given at length in V. 61, p. 368.

In January, 1898, control of the N. Y. Susquehanna & Western was obtained. The road is operated as an independent line. The acquisition will save the Erie considerable double tracking—see V. 66, p. 83 335, 573, and editorial p. 53. See STOCK below.

Nor. RR. of N. J. leased and 4 per cent guaranteed on its $1,000,000 stock in June, 1899.—V. 69, p. 81.

In June, 1899, a controlling interest in the stock of the New Castle & Shenango Valley RR. was acquired in the interest of the Erie RR. V. 68, p. 1075.

COAL AND STEAMBOAT PROPERTY.—The Erie coal properties represent an aggregate of 10,500 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee 14,000 acres of bituminous held under mineral rights. Its coal tonnage in the year 1896-97 aggregated 8,731,057 out of the 20,122,086 tons hauled. The Union Steamboat Company has its terminal and other properties in Buffalo and a fleet of eight lake steamers. See V. 63, p. 514.

STOCK.—The *stock* is to be held by J. Pierpont Morgan, Louis Fitzgerald and Charles Tennant, Bart., voting trustees, for five years, and thereafter until the new first preferred stock shall have received 4 per cent cash dividend in one year. In the meanwhile certificates of beneficial interest are outstanding. The new company reserves the right to redeem either class of its preferred stock at par in cash. Provisions of voting trust and preferred stock certificate were given in SUPPLEMENT of April, 1897, page 3.

In March, 1898, Erie pref. stock was authorized to be increased from $30,000,000 to $43,000,000, and common stock from $100,000,000 to $113,000,000, to acquire New York Susq. & Western stock.—See V. 66, p. 335, 573.

BONDS.—New York & Erie first 7s for $2,482,000, due May 1, 1897 were extended for 50 years at 4 p. c., payable p. & i. in gold. V. 64, p 180, 1040. The new first consolidated mortgage is for $175,000,000 [Farmers' Loan & Trust Co. trustee]—see **abstract** of deed V. 62, p. 89 and secures $35,000,000 prior lien bonds and $140,000,000 general lien bonds. Of the $35,000,000 *prior lien bonds*, $5,000,000 are to be used for improvements.

Of the $140,000,000 *general lien bonds*, $91,968,000 are reserved for the ultimate acquisition of all bonds and guaranteed stocks now left undisturbed on various parts of the system [excepting the $1,000,000 seconds on Buffalo & Southwestern—see list V. 62, p. 89], and $17,000,000 are reserved for new construction, betterments, additions, etc., after 1897, under carefully guarded restrictions, not over $1,000,000 to be used in any one year. The general lien bonds bear interest from July 1, 1896, first coupon being January 1, 1897, at 3 per cent per annum for two years and 4 per cent thereafter.

The position of the first consolidated mortgage is substantially as follows: It is a first lien, either by mortgage or collateral trust [the prior lien bonds, however, preceding the general lien bonds] upon the company's principal coal properties, upon its water transportation lines, including valuable terminal properties appurtenant thereto, and upon a number of profitable local lines in New Jersey and near Buffalo; it is a *second lien* upon the remaining coal properties and upon the railroads leading to all the coal properties, upon the terminals at Jersey City, upon the Buffalo New York & Erie Railroad (the main line to Buffalo) and the Buffalo terminal properties other than those upon which it is first lien, and upon the entire line from Salamanca to Chicago; it is a *second consolidated mortgage* upon the lines of the original Erie Ry. between Piermont and Dunkirk (446 miles.)

Real estate mortgages outstanding Sept. 30, 1897, $438,700.

Old Bonds—Under the first consol. mortgage of 1895 the company covenants to pay the interest regularly on all the old bonds in the table that are marked with a * or a ‡ (except N. J. & N. Y. bonds,) and to take them up and pledge them with the trustee at maturity.

A description of the *Long Dock* 6s was in March, 1894, SUPPLEMENT under N. Y. L. E. & W. The yearly rental is $450,000.

For *N. Y. Lake Erie & W. Coal & RR.*, see SUPPLEMENT January, 1895.

FIXED CHARGES.—"The fixed charges of the Erie System (calculated on all bonds which will be outstanding on completion of the reorganization) are reduced from $9,400,000 to $7,860,000 per annum (including prior lien bonds $1,176,000; undisturbed bonds and stock $5,500,000; general lien bonds, $1,184,000) and for the first two years after reorganization a further reduction of about $300,000 per annum is made to an amount nearly equaled by the net earnings of the property in 1893-94.

GENERAL FINANCES.—The old company was greatly hindered by lack of capital, but this is remedied by the bond issues allowed under the new mortgage. Control of the Northern RR. of New Jersey was purchased in July, 1897. Control of the New York Susquehanna & Western—which see—was acquired in 1898 through an exchange of stock. V. 66, p. 335, 573.

Florida Central & Peninsular RR.—*(See Map of Seaboard Air Line).*—From Columbia, S. C., via Savannah, Ga., to Jacksonville, Fla., Tampa, Cedar Keys, etc., 940 miles; of which Columbia to Savannah, 135 miles, is South Bound RR. In June, 1899, contract was reported let for extension from Cheraw to Columbia, S. C., 79 miles.

HISTORY.—A reorganization of the Florida Ry. & Navigation Co. foreclosure in 1888. V. 46, p. 289. South Bound RR. was leased for 99 years in 1893; later its capital stock ($2,033,000) was purchased.

In Feb., 1899, John L. Williams & Co. of Richmond, Va., and Middendorf, Oliver & Co. of Balt., and associates, purchased a majority of the stock and, in April, 1899, had in contemplation arrangements for consolidation into a single corporation with the other lines in their control (Seaboard & Roanoke System and Georgia & Alabama), thus bringing together a total of about 2,475 miles of road, extending from Richmond on the north to Savannah, Jacksonville and Tampa on the south, and to Montgomery and Atlanta on the west. It is also intended to issue a blanket mortgage covering the whole system.—V. 68. p. 428, 822, 826, 871.

V. 66, p. 1044, 1188. See **abstract** of mortgage, V. 52, p. 82.

Eastern Railway of Minnesota runs from Hinckley northward 70 miles, to a point near Duluth; the first mortgage covers road, equipment, terminals and elevators. The Northern Div. $15,000,000 mortgage of 1898 provides for extension building from Fosston, Minn., to the head of lake navigation at Duluth, and also for future requirements, including the retirement of the $4,700,000 1st 5s at maturity. They are redeemable at 105 on three months' notice after Apr. 1, 1928. —V. 66, p. 471. *Montana Central* bonds cover several roads. (See adv. CHRON. Dec. 12, 1891.) The Manitoba guarantees these issues, and the Great Northern assumes the guaranty.

The *Willmar & Sioux Falls* bonds are endorsed with joint and several guaranty of the Manitoba and Great Northern companies. Further issues may be made at $17,500 p. m. for additional road. V. 56, p. 247.

Minneapolis Western first mortgage is for $1,000,000. V. 60, p. 835.

GENERAL FINANCES.—The preferred stock was increased in 1898-9 from $25,000,000 to $90,000,000– see above and V. 66, p. 1188; V. 67, p. 370, 788, 842, 1003, 1356. V. 68, p. 772. In 1897-98 received $500,000 (10 p. c.), in 1896-7, $600,000 (12 p. c.) and in 1895-6, 8 per cent, in dividends on Eastern Ry. of Minn. stock.

The strength of the company is largely in its low grades and consequent large train loads (in 1897-98 averaging 316 tons).

EARNINGS.—Great North'n system (incl. St. P. M. & M., East. of Minn. and Montana Central) July 1 to June 30, 1899 (12 months) gross, $24,998,483, against $22,562,453 in 1898.

The consol. mortgage of 1897 (United States Trust Co., N. Y., and John T. Dye of Indianapolis, Ind., trustees,) is for $50,000,000 of 3½ per cent gold bonds, tax free, authorized to retire the several issues of 7s maturing from 1898 to 1903 (see **abstract** in V. 64, p. **1182**) amounting to $43,192,000, and the balance, $6,808,000 for use in refunding said bonds and for general purposes of the company. The mortgage covers 829·54 miles of main line and branches—a considerable portion being double tracked—and 181·11 miles of leased lines. The refunding of the first 7s into new 3½ per cent consols will effect a saving in interest charges, when entire $50,000,000 are outstanding, of $1,273,440 a year. See refunding plan in V. 64, p. 469, 610 and also V. 66, p. 82; V. 67, p. 956. To June, 1899, $30,542,000 of 3½s had been listed.—V. 66, p. 1140; V. 68, p. 1182.

GUARANTIES.—As to guaranties additional to those shown in table above see Detroit Hillsdale & S. W. and Fort Wayne & Jackson.

GENERAL FINANCES.—Nothing has been charged to construction or equipment account since 1883, the outlays charged to operating expenses for new equipment amounting in 1898 to $699,516, and in 1897 to $349,280 and for construction to $108,908 in 1898, against $245,179, these items being exclusive of expenditures for renewals. Profit and loss surplus Jan. 1, 1899, $7,350,713. Low grades permit large train loads; average for 1898, 352 tons, against 321 in 1897.

In Apr., 1899, $25,908,000 of the $43,192,000 7 per cents due in 1903 and earlier, and outstanding in June, 1897, had been retired and $25,908,000 new 3½s issued, thus reducing fixed charges $770,540 per annum, or 1½ per cent on the capital stock.

In Feb., 1898, a majority of the capital stock was purchased by the N. Y. C. & H. RR., which gave in exchange its 3½ p. c. bonds at the rate of $200 in bonds for $100 in stock, and offered to take the minority interest on the same terms. These coll. trust 3½s of 1898 (authorized issue $100,000,000) bear interest from Feb. 1, 1898, and are secured by deposit in trust with Guaranty Trust Co., mortgage trustee, of L. S. & M. S. stock at the rate of $100 of stock for each $200 of bonds outstanding. (V. 66, p. 288.) In July, 1899, $45,210,000 stock had been exchanged. (V. 66, p. 1237.)

The new management has extensive plans for furnishing rapid transit direct from New York City to all points east of Jamaica (covering the distance from New York to Jamaica in twenty minutes) by means of a tunnel to New York—V. 64, p. 83, 234, 754, 1001; V. 65, p. 512; V. 66, p. 471.

VOTING TRUST.—More than a majority of the stock has been deposited under a voting trust agreement dated Feb. 1, 1897, with U. S. Mort. & Tr. Co.—V. 66, p. 520.

The Atlantic Ave. improvements and tunnel to New York City (see V. 64, p. 469; V. 65, p. 512; V. 66, p. 471) are to be pushed to early completion, the Long Island & New York Terminal RR. having been incorporated on June 19, 1899, with a capital stock of $7,500,000 to build the tunnel.—V. 68, p. 546, 871, 927, 1226.

On May 6, 1899, the stockholders authorized a unified mortgage for $45,000,000 to bring together all the controlled properties into the ownership of the L. I. R. and to convert their securities into a single security of the latter. Of these, $5,650,000 were issued in May, 1899, to pay the floating debt and all real estate mortgages and equipment notes; to exchange over $2,000,000 bonds for securities of various issues outstanding, and for improvements. The refunding of the obligations will result in an annual saving in interest charges of about $24,000, offset by an increase of about the same amount by bonds issued for improvements.—V 68, p. 618, 724, 977.

Subscribers will confer a great favor by giving immediate notice of any error discovered in these Tables.

ORGANIZATION, &c.—This company was chartered March 2, 1850, and opened between Louisville and Nashville November, 1859. The liabilities for interest on the auxiliary roads are treated mostly as be onging directly to the Louisville & Nashville Co. A list of the securities owned and in the sinking fund June 30, 1896, was in V. 63, p. 658. Georgia RR. (see Georgia RR. & Banking Co.) was leased in 1881 jointly to Central of Georgia and L. & N., but in Apr., 1899, it was held that the L. & N. had acquired all rights under the lease—see V. 68, p. 722.

Terminals.—Jointly with Nashv. Chat. & St. L. leases terminal property in Nashville (belonging to Louisville & Nashville Terminal Co.) for 99 years from 1897. (V. 65, p. 278.) Contract for new station was let in July, 1898. V. 67, p. 222, 329, 742.

The *Pensacola Division* bonds are subject to a drawing sinking fund $5,000 till 1900, inclusive, then $10,000, and so increasing.

The *general mortgage* bonds of 1880 are subject to call at 110 in increasing amounts each year; $251,000 gen. mort. bonds will be redeemed June 1, 1898; also $55,000 Cecilia Branch bonds. V. 68, p. 572.

In June, 1890, the "*unified*" *mortgage* (trustee, Central Trust Company) for $75,000,000 was authorized, $41,917,660 bonds being reserved to retire all prior liens (none of the prior liens can be extended), the balance for improvements, extensions (at the rate of $32,000 per mile, including equipment), and for other purposes. The mortgage covers (besides 1,232 miles of road and its equipment) $25,992,535 stock of companies controlled, and $3,150,000 bonds free from any lien. See abstract of mortgage in V. 51, p. 613. St. Louis terminal property bonds cover freight terminals.

The *collateral trust bonds* of 1898 (see below) are secured by deposit with the U. S. Trust Co., as mortgage trustee, of $14,000,000 L. & N. unified 4s and $4,000,000 L. & N. Paducah & Memphis division bonds, the latter covering the road from Paducah, Ky., to Memphis, Tenn., 254 miles. The loan is limited to $12,500,000, and is subject to call at par on and after April 1, 1903. (V. 66, p. 337; V. 68, p. 87.)

GUARANTIES.—Besides bonds in table, the Louisv. & Nashv. is responsible for $2,100,000 bonds and dividends on $2,305,782 stock of Nashville & Decatur (which see); and for $2,096,000 Nashville Florence & Sheffield bonds.

GENERAL FINANCES.—In February, '98, the company sold, in order to provide for the floating debt, the payment of the consols due April, 1898 ($7,070,000), and to reimburse the company for the purchase of the Paducah & Memphis Division, an issue of $12,500,000 coll. trust bonds, due in 20 years but subject to call on or after April 1, 1903, deferring sale of L. & N. 4s for better prices. V. 67, p. 742. This transaction reduced interest charges (includ. int. on floating debt) about $200,000 yearly. As a result of refunding there was on Dec. 31, 1898, no floating debt, a cash surplus of about $2,000,000 and stocks and bonds in treasury worth $9,000,000 to $10,000,000. (V. 66, p. 337, 574; V. 68, p. 85.) Since July 1, 1894, the "construction account" has been closed, and in the four years ending June 30, 1898, $2,103,447 had been charged to operating exp. for permanent improvements. In Feb., 1899, dividends resumed (Feb 1½ %). V. 68, p. 85. In Aug., 1899, 2 p. c. was paid. V. 69, p. 130.

In 1897 and 1898 the company refunded at a lower rate of interest about $10,000,000 of 7 per cent bonds.

On May 26, 1899, the Louisville & Nashville and Southern Ry. acquired the 25 miles of the Birmingham Southern RR. for $1,100,000 cash. V. 68, p. 774, 1078.

The N. Y. Central Division has 287 miles laid with four tracks.

HISTORY, &c.—Control of the Lake Shore and Michigan Central roads was acquired in 1898, as stated below. In 1898-9 their earnings were reported separately, but the dividends on their shares held by the Central caused the large increase in the item "other income."

The Fall Brook Ry. lines have been leased since May 1, 1899, forming, together with the Beech Creek RR., the Pennsylvania division.

On July 30, 1899, the directors of the N.Y. Central voted to lease the Boston & Albany RR. for 999 years at a guaranteed rental of 8 per cent per annum on the $25,000,000 B. & A. stock in quarterly instalments. The B. & A. stockholders will vote upon the lease on Sept. 27, 1899, adding 389 miles and a through line to Boston to the Central system. V. 69, p. 78. As to opposition to lease, see V. 69, p. 178.

CAPITAL STOCK.—In May, 1895, $4,571,700 stock was listed on the Exchange, making total listed $100,000,000; V. 60, p. 874. Dividends on stock registered in London are payable in gold at 49½d. to dollar.

BONDS.—Description of debentures was on page 3 of SUPPLEMENT of April, 1895. They are all secured by the refunding mortgage of 1897 equally with the 3½s. *Ref. mortgage* is for $100,000,000, of which $70,377,333 reserved to retire existing bonds at or before maturity and $14,622,667 for premiums; the remainder ($15,000,000) is reserved for new construction after 1903. The mortgage covers all the road, franchises, leases, equipment, etc., and will retire all the company's former indebtedness, both mortgage bonds and debentures. In Feb., 1899, $32,447,000 3½s of 1897 had been issued to retire $26,893,912 of old bonds. V. 68, p. 380.

Collateral trust 3½s of 1898 are secured respectively by deposit in trust with the Guaranty Trust Co., mortgage trustee, of stock of the Lake Shore & Michigan Southern and Michigan Central RRs. at the rate of $100 of L. S. & M. S. stock for each $200 of bonds and $100 of Mich. Cent. stock for each $115 of bonds outstanding. The total authorized issues of 3½s are $100,000,000 for Lake Shore and $21,550,000 for Michigan Central. The loans are secured by separate deeds of trust. See V. 66, p. 288, 336, 760, 811.

GUARANTIES.—The company guarantees the securities of its leased lines to a considerable aggregate—see separate statement for each company marked with a ¶ in the table of mileage preceding. It also guarantees Western Transit Co. 4½s for $1,000,000 due February, 1903.

GENERAL FINANCES.—The refunding of the $70,377,000 of old high-interest-bearing bonds into the 3½s of 1897 during the years 1898 to 1905 will effect a saving of $1,200,000 per annum in interest charges; to June 30, 1898, $21,480,986 old bonds had thus been retired at an annual saving in interest charge of $197,711.—V. 67, p. 54.

In Jan., 1899, the company had acquired $45,210,000 of the capital stock of the Lake Shore road in exchange for 3½ p.c. bonds (see above), leaving $1,256,500 afloat, including $533,500 guaranteed 10 per cent dividends (see V. 66, p. 288, 336, 1238), and also $16,073,400 of Mich. Central stock, leaving $2,664,600 still outstanding. V. 66, p. 760, 1238.

ANNUAL REPORT.—Fiscal year ends June 30. Report for 1897-98 was given at length in V. 67, p. 527, 591. Advance statement for 1898-9 (partly estimated) was in V. 68, p. 1223. See also editorial p. 1206.

BONDS.—*Consolidated mort.* of 1873 for $100,000,000 secures all the consols equally, though issued at different dates; of the amount authorized, a sufficient amount is reserved to retire the general mortgage of 1867. It covers all the property and franchises of the company, including its main line from Philadelphia to Pittsburg, and branches, being a total of 517 miles, partly four-tracked, together with real estate and equipment. It is also a first lien on the company's leasehold interest in other railroad lines and canals, as well as on shares and bonds of other companies of an estimated cash value of over $50,000,000. These securities produced in 1892 an income of over $2,600,000. Sinking fund for consols Jan. 1, 1899, held—Consols canceled, $1,771,980; other securities and cash $5,861,084.

The 4 *per cent loan of* 1881 is secured by pledge of Philadelphia Wilmington & Baltimore stock.

The *collateral trust* loan of 1883 is secured by the deposit of mortgage bonds of subsidiary lines to the par value of $13,576,000.

The guaranteed securities are bought with 1 per cent of the net income yearly, and $9,276,550 (par value) so purchased were held Jan. 1, 1899.

ORGANIZATION.—The Philadelphia & Reading RR. (chartered April 4, 1833) and the P. & R. Coal & Iron Co. were sold in foreclosure Sept. 23, 1896, and reorganized per **plan** in V. 61, p. 1109.

In the reorganization the 41 millions of old stock and the 56¾ millions of old preference income bonds were assessed 20 per cent, the stock then receiving 100 per cent in new common and the preference incomes, common and preferred stock in certain proportions.

The "Reading Co." in the reorganization of 1896 acquired the stocks, bonds, real estate, equipment, etc. (as per balance sheet, V. 64, p. 711). of the old Phila. & Reading RR. Co.; also $20,000,000 stock and $20,-000,000 bonds of the Philadelphia & Reading Ry. and the $8,000,000 stock of the Coal & Iron Co., and against all this property issues its own securities. See V. 64, p. 709.

The property of the Reading Company, as distinguished from the property of the Phila. & Reading Ry. Co. (which owns the railroad but no equipment), and of the Coal & Iron Co., consists of the following:

Railway equip. leased to Ry. Co. for 8 p. c. ($1,356,000) y'rly.	$16,950,000

Claims against other companies, etc.....	3,344,384
Total (total est. revenue, $3,628,023. (See V. 64, p. 710)..	$193,613,902

VOTING TRUST, ETC.—All classes of stock of the new company are to be held by voting trustees (J. Pierpont Morgan, Frederic P. Olcott and Henry N. Paul) for five years, and thereafter until 4 per cent cash dividend per annum shall be paid on the first preferred stock for two consecutive years, though the trustees may in their discretion surrender the stock at an earlier date. As to stock privileges see V. 64, p. 709. See copy of **voting trust agreement** V. 64, p. 955, and also SUPPLEMENT of April, 1897, page 5.

BONDS.—The *New General Mortgage* 4s (**abstract** V. 64, p. 612) are secured by mortgage and pledge of all properties and securities embraced in the reorganization, and also all other property acquired thereafter by use of the new bonds. They will have a sinking fund out of the revenues from the Coal & Iron Company, but are not subject to compulsory redemption prior to maturity. The new mortgage is also, subject only to the bonds for which reservation is made, based upon properties or securities of all the lines of railroad owned, including the Philadelphia & Reading Railway Company proper, 391 miles; various leasehold lines, 597 miles; all the property of the Coal & Iron Company, or the securities thereof, representing nearly 200,000 acres of coal and timber land; equipment valued at about $12,000,000, previously subject to about $5,000,000 of car trust obligations [acquired under the plan] and also the marine equipment.

Furthermore, it has a first lien upon a majority of the capital stock of various companies in the system owning 448 miles of railroad, of which 195 miles are leasehold lines included in the 597 miles above stated, and also on bonds of roads in the system (other than the P. & R. Ry. Co.) amounting to $34,265,936 par value. The securities are said to have earned in 1894-95 an income of $585,-000, of which $448,000 was received as dividends—list in V. 64, p. 613.

The new mortgage is for $135,000,000, was issuable only as follows:

To take up undisturbed bonds of the Reading RR. and Coal & Iron Co.....	$64,631,000
For future construction, equipment, etc., at not over $1,500,000 per annum under stringent provisions.....	20,000,000
Issued at once for reorganization purposes	50,369,000

Improvement mortgage 6 p. c. bonds of 1873 due Oct. 1, 1897, were extended at 4 p. c. for 50 years from April 1, 1897, payable in U. S. gold and guaranteed p. & l. by the Reading Co. V. 64, p. 470; V. 65, p. 516. The *consol* 5s of 1882 for $5,673,042 were also extended at 4 p. c. till Mar. 1, 1937, the Reading Co. and Coal & Iron Co. becoming responsible. See V. 65, p. 870, for contract. V. 65, p. 152, 870.

The *terminal mortgage bonds* are Reading RR. bonds, and are secured by a mortgage upon all the property of the Terminal Co. and by a traffic contract between Reading and the Terminal Co. The trustee is the Provident Life & Trust Co. of Phila. Amount authorized, $8,500,000. See description in V. 64, p. 85 and guaranty V. 60, p. 732.

For *ten year sinking fund loan* see January, 1895, SUPPLEMENT.

The *coal trust certificates* under agreement of May, 1895, are not redeemable until April, 1904—see V. 63, p. 838 and Jan., 1895, SUPP.

As to *Philadelphia Subway Loan* the receivers were authorized in June, 1894, to pay interest and principal at maturity) of not exceeding $3,000,000 out of a total issue of $3,000,000 of 3 to 3½ p. c. bonds of City of Philadelphia, to abolish grade crossings. The amount outstanding will be increased to this figure on completion of the subway. Principal is payable after ten years from date of loan in 20 annual instalments. See V. 58, p. 1110; V. 62, p. 950, V. 63, p. 881.

As to the $64,631,000 outstanding old bonds (see V. 64, p. 614), the Reading Co. and the Coal & Iron Co. covenent to pay their interest when due and to pay or extend their principal at maturity.

ORGANIZATION.—Organized under laws of Kentucky, and known as the "Huntington" lines, Mr. C. P. Huntington being President. Under plan for readjustment of Central Pacific securities, the Southern Pacific will acquire substantially the entire capital stock of the Central Pacific. See that company's statement; also see below.

PROPRIETARY LINES.—These, with a total mortgage indebtedness June 30, '98, of $156,983,601, are mostly owned—only $16,253,163 out of their total stock of $197,257,552 not being held on July 1, 1898, by the Southern Pacific Co. "OMNIBUS LEASE," see SUP'T of Jan., 1899.

STOCK, ETC.—Total stock authorized, $200,000,000, including $67,275,500 to be exchanged for Central Pacific stock—see Central Pacific and V. 68, p. 378, 725; V. 69, p. 132. July 1, 1898, bills payable, $1,425,000.

BONDS.—The fifty-year 4 per cent collateral trust gold bonds to be issued by the Southern Pacific Co. in 1899, in connection with its acquisition of the stock of the Central Pacific, are for the total authorized amount of $36,819,000, and are subject to call at par on six months' notice. The first issue of $28,819,000 is to be secured by the $67,275,500 common and $12,000,000 preferred stock of the Central Pacific, issuable forthwith. The remaining $8,000,000 can be issued from time to time only as an equal amount of Central Pacific preferred is received and added to the collateral, $5,000,000 of this stock being reserved for improvements and additions on the Cent. Pac. at not exceeding $200,000 yearly—see Cent. Pac. and V. 68, p. 378.

The new first refunding 4s and 30-year gold 3½s issued by the Central Pacific will be unconditionally guaranteed, principal and interest.

GENERAL FINANCES.—The issue of $28,819,000 collateral trust bonds in 1899 for part purchase of Central Pacific stock will increase the Southern Pacific annual charges by $1,152,760, making total net annual interest charge on account of the Central Pacific $4,862,760, as against $4,269,905 for the year ending June 30, 1898, or an increase of $592,855. Against this increase there was a surplus on the Central Pacific for the last year, after charging all betterments to earnings, of $1,561,463, and a surplus on the Southern Pacific of $2,823,344, a total of $4,384,807.

Of the lines owned and leased in July, 1898 (14 miles are leased), 2,300 were operated in the So. Pacific system, 242 miles (Mojave to The Needles) being held under long lease by Atchison in exchange for leases of 350 miles of roads in New Mexico and Arizona. V. 65, p. 931, and Atch. T. & S. F. item, p. 1113; see V. 64, p. 609. The construction of 55 miles from Ellwood, Col., to Surf, expected to be completed during 1899, will furnish another through line near the coast from Los Angeles to San Francisco. (V. 68, p. 617.)

ORGANIZATION.—A consolidation in April, 1898, of Southern Pacific RR. of California, Northern Ry. of Cal., Northern Cal. and Cal. Pac. The Southern Pac. RR. of Cal. was leased to Southern Pac. Bonds may be issued not exceeding $30,000 per mile, of which $7,500 a mile is reserved for additions and betterments. See V. 57, p. 469. This mortgage in January, 1899, covered 1,982 miles, of which it is an absolute 1st lien on 724 miles. The supplemental mortgage issued in 1898 limits this loan to $30,000,000, (exclusive of bonds to be issued against underlying securities), of which not exceeding $26,000,000 shall be issued until completion of coast line from Surf to Ellwood. It also provides that the bonds assumed in the consolidation of 1898 are not to be increased, and that in case of increase of the mortgage indebtedness, except for newly-acquired property, the stamped bonds are to share pro rata in the security given by the additional mortgage. (V. 67, p. 1111.)

LAND GRANT.—The land grant was 12,840 acres per mile, and proceeds of sales go to retire bonds, but a large proportion of the lands barren and useless for agricultural purposes without irrigation. The company proposes in 1899 to complete a line to Savannah, Ga., from Columbia, S. C., of which the Carolina Midland, purchased in May, 1899, will furnish about 52 miles.—V. 68, p. 620, 947, 979.

ORGANIZATION, ETC.—A reorganization in 1894 of the old Richmond & West Pt. Ter. Railway & Warehouse system. The reorganization **plan** presented in May, 1893, was given in full in V. 56, p. 858, 874, and certain changes thereof in pp. 1016, 1058, and V. 57, p. 61. The modified plan of Feb. 20, 1894, was given in full in V. 58, p. 363, 385. As to Cincinnati New Orleans & Texas Pacific, see V. 65, p. 1173. On July 1, 1898, absorbed Memphis & Charleston.—V. 66, p. 39, 185.

Mobile & Birmingham RR. (149 miles) was leased from June 1, 1899, for 99 years.—V. 68, p. 429, 1134.

In Apr., 1899, purchased the Northern Alabama, Sheffield to Parrish, Ala., and branch, 119 miles (V. 68, p. 824, 873); also acquired control of and leased the South Carolina & Georgia, the lease of the Augusta Southern passing with it.

In May, 1899, purchased a portion of Atlantic & Yadkin Ry. north of Sanford, N. C., to Mt. Airy, 166 miles, and issued thereon $1,500,000 50-year 4s, (V. 68, p. 979); also purchased Carolina Midland, Allendale, S. C., to Seivern, 55 miles, and Seivern & Knoxville, Seivern to Batesburg, 17 miles.—V. 68, p. 979.

STOCK.—Authorized $120,000,000 *common* and $60,000,000 *five per cent non-cumulative preferred stock*. No additional mortgage can be put upon the property, nor can the amount of the preferred stock be increased without the consent of holders of a majority of the preferred. The preferred stock is redeemable in cash at par.

Both classes of stock of the new company (except sufficient to qualify directors) are deposited with three stock trustees. The stock shall be held by the stock trustees and their successors, jointly till July 1, 1899, and for such further period (if any) as shall elapse before the preferred stock shall have paid five per cent cash dividend in one year, although the stock trustees may, in their discretion, deliver the stock at an earlier date. Certificates of beneficial interest, entitling the holder to dividends, are issued in lieu of the stock so deposited. Stock trustees, J. Pierpont Morgan, Charles Lanier and George F. Baker. Provisions of voting trust and pref. stock cert. in SUP. of April, 1897, page 6.

DIVIDENDS.—On preferred in 1897, Jan., 1 p. c.; in 1898, Jan., 1 p. c.; in 1899, Jan., 1 p. c.—V. 67, p. 1303.

BONDS.—The new *first consolidated mortgage*, Central Trust Co., N. Y., trustee (see **abstract** in V. 59, p. 783), is secured by mortgage and pledge of all the property of the company. The total authorized issue is $120,000,000 of 5 p. c. gold bonds, as follows:

Issued to June 30, 1898 (of which $945,000 in treas)	$28,804,000
Issuable only to retire certain "prior bonds" (see V. 59, p. 785)	69,055,000
Issuable only to retire certain stocks (see V. 59, p. 786)	5,700,000
Issuable only to retire certain equipment obligations (see V. 59, p. 786)	1,498,700
To be issued hereafter only for extensions and additions at not exceeding $2,000,000 yearly, with a single exception as to $4,000,000 (see V. 59, p. 786)	14,942,300
Total authorized issue	$120,000,000

Prior bonds must be paid by maturity.

Divisional First Mortgage bonds, issued in 1898 on account of purchase of Memphis & Charleston Ry., bear 4 per cent interest from Jan. 1, 1898, to July 1, 1901; then 4½ per cent to July 1, 1906, and 5 per cent thereafter. The total authorized issue is $8,000,000, but $1,500,000 can be used only to build a line replacing trackage between Stevenson and Chattanooga, 38 miles. Of the remainder of the loan, $5,083,000 are issued to retire old mortgage indebtedness. The bonds cover the 292 miles of main line and branches, at $17,408 per mile. The balance ($1,417,000) is held for betterments at not exceeding $100,000 yearly. See description of loan in V. 67. p. 179.

Second mortgage on former Memphis & Charleston secures $2,500,000 of 5 per cents, of which $1,000,000 reserved for improvements.

GENERAL FINANCES.—On May 26, 1899, the Southern Railway and the Louisville & Nashville purchased about 25 miles of the Birmingham Southern RR. in the vicinity of Birmingham, Ala., from the Tennessee Coal Iron & RR. for $1,100,000 cash. V. 68, p. 774.

HISTORY.—Incorporated in Utah June 23, 1897, to succeed per **plan** of Oct. 15, 1895 (V. 61, p. 704, 705, and V. 64, p. 424), the Union Pacific *Ry.* Company took possession of the Union Pacific main line Feb. 1, 1898, and of the Kansas Pacific lines on April 1. A full statement to New York Stock Exchange as to the organization of the new company was in V. 66, p. 618; see also V. 67, p. 790.

Oregon RR. & Navigation Co. is practically controlled through ownership of a majority of its common stock by the Oregon Short Line. V. 69, p. 181. The reorganized U. P., therefore, operates through to Portland, Ore., as did its predecessor.

The former Julesburg branch of U. P. Denv. & Gulf, La Salle, to Julesburg, 151 miles, was transferred to U. P. on Feb. 25, 1899. V 68, p. 381.—(See V. 66, p. 521).

STOCK.—The rights of the preferred stock are set forth in the company's articles of association as follows: "Such preferred stock shall be entitled in preference and priority over the common stock of said corporation to dividends in each and every fiscal year at such rate not exceeding 4 per cent per annum, payable out of net profits, as shall be declared by the board of directors. Such dividends are to be noncumulative, and the preferred stock is entitled to no other or further share of the profits."

The U. P. stockholders voted Jan. 10, 1899, to increase the common stock from $61,000,000 to $88,460,100 to acquire, dollar for dollar the Oregon Short Line stock, the Short Line stockholders paying in addition $3 per share. On July 24, 1899, $87,585,400 stock had been issued.—V. 68, p. 87; V. 67, p. 1209.

DIVIDENDS.—First on pref., 1½ p. c., Oct 3', 1898. V. 67, p. 635. On Apr. 19, 1899, 1½ p. c. was paid on preferred. V. 68, p. 476.

BONDS.—The new first mortgage (Mercantile Trust Co., trustee), is for $100,000,000, of which $90,000,000 was issued for the acquisition, free and clear of all Government and other liens, of the 1,854 miles composing the former Union Pacific and Kansas Pacific lines. In March, 1899, the first M. bonds had been issued to the amount of $96,500,000, of which $5,000,000 held in the company's treasury. The remaining $3,500,000 may be used pursuant to the mortgage in the construction or acquisition of betterments, improvements, equipment or extensions, to be subject to the mortgage lien, at a rate not exceeding $1,500,000 per annum. The property on which the loan is a first lien includes the telegraph terminals, equipment, and, directly or indirectly, land grants. Statement to N. Y. Stock Exchange. V. 66, p. 618.

LANDS.—The new first mortgage covers directly or through beneficial ownership over 6,500,000 acres of land, situated in Nebraska, Wyoming, Colorado, Utah and Kansas, the value of which has been estimated at $8,977,500. It also covers further notes or contracts for lands sold, which the Land Department considers safe, to the extent of $2,196,858, and notes representing 2,402,000 acres of lands sold which the Land Department considers doubtful or bad, and the lands for which, if not paid for, revert to the company. See V. 67, p. 791.

GENERAL FINANCES.—The free assets held in the company's treasury consist of large amounts of bonds and stocks of auxiliary railroad and other companies, such as the Union Pac. Coal Co., the Pac. Express Co., various water, depot, etc., companies, and yielded during the last fiscal year a net income of approximately $500,000, this income being additional to the earnings from the railroad lines.

LATEST EARNINGS.—For 11 months ending May 31 on the 2,248 average miles, after deducting taxes:

The Wabash will also pay its quota of the cost of operating and maintaining the joint section. (See V. 66, p. 812.) The new equipment required for this connection to be acquired with car trusts.

People's Gas Light & Coke (Chicago).—An absolute consolidation on Aug. 2, 1897, of the companies forming the old Chicago Gas Trust. The $25,000,000 Fidelity receipts, which previously represented the several properties, were exchanged dollar for dollar for stock of the People's Gas Light & Coke Co.—V. 64, p. 1088; V. 65, p. 235. Mutual Fuel was purchased in November, 1897, and early in 1898 consolidated, as was also the Hyde Park Co., with the People's Gas-Light & Coke Co. The Universal Gas Co. (stock, $1,500,000) is controlled in the company's interest.—V. 67, p. 179; V. 68, p. 474. The only gas company of account in the city not controlled is the Ogden Gas Co., which in July, 1899, was proposing to issue $10,000,000 bonds for extensions, etc. V. 69, p. 81.

In Sept., 1898, all disputes with the Indiana Oil & Gas Co. were settled, the People's Co. agreeing to expend not exceeding $1,500,000 in the next three years in exploiting natural gas in Chicago. V. 67, p. 690; V. 68, p. 825, 1182. Manhattan Oil Co. also was purchased, it is reported, for about $1,500,000.

PROPERTY.—In service January, 1899, including Mutual and Hyde Park properties: Street mains, 1,584½ miles; meters, 230,293; public lamps, 28,073.—See V. 66, p. 382.

DEALINGS WITH CITY.—In June, 1891, a settlement was reached by the several companies on the basis of the city getting 3½ per cent of the gross receipts, or at least $150,000 per annum, and paying $1 per 1,000 feet for its gas—the price of gas to other consumers to remain at $1 25 until 1893, when a reduction of five cents in the price must be made yearly until $1, the present price, was reached. See V. 52, p. 939.

STOCK.—In December, 1898, stock was increased $5,000,000 to $30,000,000 for exploitation of natural gas, extensions and improvements, of which $3,750,000 was allotted to stockholders at par, raising the outstanding amount to $28,750,000.—(V. 67, p. 1111.)

THE MANUFACTURE AND TESTING OF CAR WHEELS.

The safety of train operation depends so essentially upon the quality of the wheels under the cars and locomotives that it is obvious that great care must be taken by railroad officials to assure the use of wheels which are thoroughly sound, of good quality and not liable to breakages. The railroads may fairly claim that they have done much toward improving the quality of car wheels, especially in the last few years, since rigid inspections and tests of wheels have been more generally carried out. Breakages of wheels in service are much less frequent than formerly, and this has diminished the number of derailments, formerly one of the most frequent classes of train accidents, and still by no means done away with, even as it relates to wheel breakages. Considering the much severer service to which wheels are now subjected by the great increase in the capacity of locomotives and rolling stock, the higher speed and harder conditions generally, the lessened number of wheel breakages now recorded is very good evidence in itself that the railroads are using wheels of far better material and of more careful manufacture than ever before.

This, as indicated above, is largely due to the railroads insisting upon wheels passing certain tests as to their strength and wearing qualities. The enlightened self-interest of some manufacturers in improving their product has also counted for much. Wheels were formerly accepted by the railroads and put in service on the guaranty of the maker that they would run a specified number of miles in service, or would last a definite number of years under cars, before being worn out. A wheel which was broken or gave evidences of weakness during the life of the guaranty was simply replaced by the maker. The frequency and seriousness of accidents due to wheel breakages warned the railroads that some more business-like plan than this rather easy-going method must be carried out in purchasing wheels. Step by step the requirements of the railroads have become more and more severe, calling for constant improvements in the quality of the wheel metal and in the strength of wheels, until it is even a question with some officials as to whether the requirements are not too severe in some respects.

It is usual in these days to buy wheels on strict specifications as to the chemical composition of the metal used in their manufacture, their strength, etc., instead of on the mere guaranty of the maker. Before being accepted and put in service, wheels from each lot are carefully tested, first under the so called drop test to determine the strength, and, secondly, by the thermal or heat test to determine the quality of the metal. Besides these, is the guaranty of the manufacturer as to the mileage the wheels will make and a service record of each wheel is kept, not, as formerly, chiefly with the idea of making it a possible basis of a demand for replacing defective wheels, but rather to help in determining the wearing qualities and the causes of defects when these develop. In such service records the manufacturer is as much interested as the railroads.

No matter how strictly the specifications may be drawn as to the method of making wheels, it is not wise to accept them for service without testing their strength so far as this is possible. To accomplish this the drop and thermal tests are used. In carrying out the former a wheel selected from each one hundred cast is placed flat on a solidly built anvil block, with supports for the flanges. The wheel is then struck centrally upon the hub by a weight, let us say of 140 pounds, falling from a height of 12 feet. If the wheel stands about fifteen of these blows without breaking in two or more pieces, the lot of one hundred from which it is selected may be accepted by the railroad, so far as this test is concerned. The heat test, which is not so generally used, is a much more severe trial. The wheel selected is laid, flange down, in green sand, and a channel-way 1½ inches wide and 4 inches deep is molded around the wheel. The clean tread of the wheel forms one side of this channel-way and the

flange so much of the bottom as its width will cover. The channel-way is then filled to the top with molten cast iron poured from one point and forms a ring around the tread of the wheel. An examination of the wheel is made two minutes after the pouring ceases, and if it is found that the wheel is broken in pieces or if cracks in the plate extend to the tread, then the lot of one hundred from which the tested wheel came is rejected. If the wheel stands the test without developing defects, the lot from which it was drawn is accepted for service.

BOILER FEED-WATER PURIFICATION.

Steam users are everywhere more or less bothered by impurities in the feed water of boilers encrusting the flues and other parts of the heating surfaces with scale and other deleterious substances. In locomotive service the formation of scale in boilers is peculiarly troublesome, for necessarily the sources of water supply are numerous and the quality of the water often inferior, and varying widely at different points on any line. This whole question has long received careful attention, but it is becoming of increasing importance to secure good feed water for boilers. The water at points where it is proposed to locate water-supply stations is now very carefully tested as to its chemical quality to determine its desirability as a boiler feed water, and the location of the tanks is governed by the results of these tests. It is generally considered the better policy to build or even change a water station to a point where a purer supply can be obtained than to be content with poorer water in order to save in the first cost of the station.

In a good many places, however, there is little to choose between the quality of water available. In Western States, particularly, the whole supply is often poor and ruinous to boilers, if admitted without previous treatment. Many railroads have to treat every gallon of water used in locomotive boilers. There are various ways by which the quality may be improved. For the most part these methods are inexpensive and comparatively simple, but there are places where a fairly good water supply cannot be obtained except by chemical or mechanical treatment. The easiest method is to treat the water with some simple chemical as soda ash, after it is delivered from the station tank to the tender, and before it is admitted to the boiler. In the majority of cases, the use of simple reagents is sufficient to precipitate the lime salts and magnesia which form the scale in boilers. Where something more than this is required, the water may be chemically treated in the stand tanks, or mechanical devices may be used. Extensive mechanical filtering plants are sometimes desirable, and water purification by evaporation is considered by some the most effective practice.

The practicable methods of water purification, it will be seen, are quite numerous, and the choice among them will depend to a large extent upon the particular condition of the water needing treatment. The expense also differs to a large extent, but it seems safe to say that the cost of purifying water will always be cheap when compared with the use of water which causes trouble in boilers. It is essential, of course, to first understand all the conditions which affect the water supply, and more and more attention is being given to this question.

Chemical analyses of boiler feed waters are now regularly carried out on those large roads whose water supply is at all affected by alkaline or other conditions which result in the formation of scale on the flues or boiler plates.

If the water contains only a small amount of encrusting matter, with a low proportion of sulphates, it may be treated with soda ash at a cost of about 40 cents per thousand engine miles, or say about six mills per thousand gallons of water. Where this cannot be done, the water may be treated in the station tanks, which is probably the next simplest method. The actual treatment of the water in these tanks probably costs more than by the direct method of purification, while the automatic features for introducing the reagent into the water, add to the first cost, over an ordinary receiving tank, where no treatment of the water is to be made. There is the advantage that each source of supply can be independently treated, and the treatment varied as may be desirable, while there is no doubt that the purification can be made more complete.

Filters may be so simple or so elaborate that the cost of this method is very flexible. In its simplest form there is little expense after the first cost, though when mechanical filters are used there is more or less charge for maintenance. The evaporative method, if it is called the most effective, is also the most costly, and large plants must be installed to warrrant its use.

Some mechanical officers think that the best results, both in effectiveness of the treatment and in the matter of expense, are obtained by using blow-off cocks on the engines, with perforated pipes in the boiler, so placed as to carry through them the water most heavily impregnated with foreign matter. At the ends of locomotive runs, the blow-cocks are opened and this water blown off. This method is said to allow the running of an engine for 5,000 miles between boiler-washings. Its cost, after the engine is equipped—a small matter in itself—is merely the cost of the heated water blown off, which may amount to say 4 per cent of that in the boiler; but mechanical purifiers are not suitable when there is much sulphate.

It is apparent that the question of getting a suitable supply of boiler feed water is an important one with many sides to it. Very few railroads are fortunate enough to have water which is thoroughly satisfactory for use in their engine boilers without some attempt at purification, and even roads which do not find a careful system absolutely necessary, obtain important benefits by treating their water. The engine mileage made between boiler washings is increased, foaming is prevented, the deterioration of the boiler is reduced, and the life of flues extended.

A RAILROAD SCIENTIFIC RESEARCH LABORATORY.

The most interesting topic presented for discussion at the summer convention of the Master Mechanics' Association related to the proposal to establish a scientific research laboratory. The suggestion was made the subject of the most comprehensive committee report of the meeting, showing an intelligent grasp of the whole subject. It spoke most forcibly of the work being done by the members of the Association, without the stimulus of any personal advantage to be derived, in striving to promote the general utility of the railroads.

The fact that several hundred men, the mechanical heads of the more important roads of this country

meet together annually in voluntary association, to discuss such problems as these, affecting progress in operating efficiency, is very significant of the spirit generally animating railroad officers. Perhaps not less significant is the wide acceptance of the conclusions of the Association, in matters of practice, though they are not binding on any one. These conventions, through their discussions of every-day problems of railroading, have played an essential part in the advancement of uniform practice on the railroads, which has been of immense benefit to them.

A research laboratory if created, as now proposed, will carry still further the idea of uniformity in mechanical appliances from the nature of the work it would undertake. The committee, in the opening paragraph of its report, has so well stated the conditions which seem to it to justify the proposal for such an organization that its words may well be quoted. It says: "The most significant results which thus far have been presented to the Master Mechanics' Association are those which have been derived from carefully conducted experiments and study, a process which, for the purposes of this report, will hereafter be referred to as research. These, while they have benefited all roads alike, have been obtained as the result of personal sacrifice on the part of comparatively few members and at the expense of only a few roads. The establishment of a research laboratory by this Association would be proof of its readiness to adapt itself to the demands of more exacting conditions, and would show in a fitting manner its sense of fairness in requiring contributions from all those who receive benefits."

What the committee very properly calls the more exacting conditions of railroad service, preclude the continuance of many methods, more or less loose in their application, which have been permissible in other days when railroad practice was in a less developed stage, the competition among the roads not so keen, and the margin between the receipts and cost of service less narrow. Every advantage which can be suggested in reducing the bills for supplies and the repairs of equipment (to mention only those matters with which a research laboratory would be concerned) must be availed of. One of the lessons of the recent hard times has been that while it was difficult to make money by attempting to improve rates or increasing business, there were large opportunities found for making money by saving it.

The development of methods for decreasing the cost of transportation service in the past few years has been very striking, and must be regarded as only well started, and by no means pushed as far as is possible. The proposal to equip a research laboratory means, in one sense, that the more obvious methods of saving money and reducing expenses in one of the great disbursing departments of the railroads, have been, for the most part, put in force. More careful and methodical efforts must now be resorted to for other economies. That is to say, the practices that grow up in any great business, more or less wasteful in their application, having been remedied in the railroad industry, further economical results must be obtained by the roads, not so much by reforming methods of practice as by the most careful examination and tests of the composition of materials. This involves experimental research, which will determine the best use of appliances and material.

That there are almost limitless opportunities for a railroad research laboratory to bring about useful and money-saving results will be readily appreciated by considering the tremendous sums spent annually by the railroads for materials of all sorts—equipment, coal, lubricants, metals, and so on. The Master Mechanics' Committee estimated, roughly, that the railroads in this country have in service 1,230,000 freight cars, 33,000 passenger cars and 36,000 locomotives, and placed the value of this equipment as probably $900,000,000. The cost of keeping up repairs was estimated as $60,000,000 annually. If to this is added the annual cost of renewing rails, ties, bridge material and other roadway work, it will be seen that the amount represents a very great outlay. Obviously the expenditure of such large sums, no matter how carefully it may be conducted, will afford room for effecting important savings, if new methods are employed as developed by careful and systematic study of the problem.

The committee remarks that "there are thousands of points and questions in regard to the design of railroad cars and locomotives which should be cleared up, and upon which valuable (having a cash value) information should be obtained by the proper investigation, conducted in a thorough and reliable manner." There have been a number of such investigations to prove the value of experimental research. To name only a few of these may be mentioned the Pennsylvania's elaborate tests of heavy axles, the well-known Dudley examinations into the deflections in rails, the Purdue locomotive and car wheel tests, etc., but these have been conducted by private companies or interests, though the railroads generally share in the benefit. The Master Mechanics Committee now proposes that the railroads represented in the Association unite in providing for the cost of an organization to conduct such experiments, all the roads sharing in the knowledge gained. This would permit of experimental work going on all the time, and those who have most studied the question believe that the direct cash benefit to be derived would be very large.

A number of the larger companies are able to equip and conduct their own laboratories, but these for the most part are wholly given up to routine work, such as examination of water, analyses of the fuel value of coal and chemical and physical tests of material. This routine work, valuable and necessary as it is, would be subordinated in the proposed Association laboratory to experimental and research work. Moreover, as all the roads would have interests in it, its researches would be available to all, and each company in due order could initiate investigations.

As the matter now stands, it is still held for consideration in details by the Committee, and will again come up before the Master Mechanics' Association at the next convention. It would appear that only the question of cost stands in the way of the idea being promptly accepted and carried out.

THE UTILITY OF LARGE CAPACITY CARS.

Just about a year ago, occasion was offered to call attention in these columns to all-steel railroad cars of 100,000 and 110,000 pounds capacity, the first designs of which had then been in service only a few months. The period, less than two years, which has elapsed since those cars began running has been an eventful one in the steel car building indus-

try. It has experienced one of those growths, remarkable in one sense, but yet to which there have been so many parallels in the industrial history of this country, that they are not matters to which any particular prominence is given or which seem to be looked upon as specially noteworthy.

The plain record, however, is that a product of manufacture, each individual unit of which represents a cost of, say $1,000, has so well fulfilled the purpose for which it was designed, that orders for upwards of 15,000 duplicates have been placed with the manufacturers within a year. Further, the success attained has warranted the building of a plant, now well under way, capable of turning out 25,000 of these steel cars annually. Here, then, is an industry whose output may be assumed as of a value of $25,000,000 annually, created within about two years' time.

The 50-ton steel car has thus fairly won its way into favor with the railroads. It has not done so without overcoming prejudice and even opposition. It is only fair to state, however, that the railroad men, no matter what their previous opinion may have been, have very freely admitted its utility as soon as that was demonstrated. The large capacity all-metal car has seemingly proved that it has a wider range of adaptability for carrying freight than at first recognized; that it is easily handled by the operating department in mixed trains or in trains made up altogether of cars of its own type; that the wear on a good roadway is not excessive, while the cost of repairs has so far proved to be quite nominal, even when the cars have been in serious wrecks which destroyed the wooden cars. Finally, the economy in their use and the advantages claimed in reducing the proportion of dead weight to paying load have been fully realized.

One development, directly traceable, we presume, to the admitted success of the all-steel cars, has been an unusual activity among the designers of wooden cars to increase the capacity of that type. This has been further encouraged by a new willingness among the railroads to order these larger capacity cars in liberal numbers, whereas their utility has heretofore been doubted for reasons which did not apply to all-steel cars. A number of recent orders, footing up several thousand, have been placed for wooden cars of 70,000 lbs. and 80,000 lbs. capacity, and even a few of 100,000 lbs. Though designated as wooden cars, they are practically of composite material, steel entering into their manufacture so largely to reinforce their strength as to be, perhaps, two-fifths of the material used.

These large-capacity wooden cars are of the box type, and are for moving general freight. The heavy all-steel cars are of the open type for coal and ore traffic. It is not practicable to build wooden cars for the latter class of traffic to carry anything like the load obtainable by the 50-ton steel cars.

The demonstration of the merits and advantages of the large capacity steel car is sufficiently conclusive to lead many roads to conclude that the box cars of equally large capacity as the open 50-ton steel cars will be profitable; this is all the more important, because from an operating standpoint there is considerable difference in many of the conditions affecting the running of ore and coal cars and closed cars carrying merchandise, etc. The former are practically always assured of a full paying load, and long trains of them can be moved from the mines to destination. There would, however, seem to be a question whether a paying load for 40-ton and 50-ton box cars can be secured a sufficient proportion of the time to make their building profitable to the roads using them. That point, however, has been largely settled in favor of their use by the orders given for them in recent months.

IMPROVED TRACK CONSTRUCTION.

Railroad-maintenance-of-way engineers have long been engaged in the effort to devise a more permanent form of track construction than that now so well established in railroad practice. The cross-tie stem, almost universally used, has the considerable advantage of a very material economy in first cost, but it requires constant labor to maintain it in good condition. The cost for track repairs seems out of all proportion to the amounts originally invested in the construction of the roadway. The number of cross ties used varies usually between 14 and 18 under each 30-foot rail, and as their perishable character calls for frequent renewals, the track is in almost a continuous state of disturbance, tie renewals going on practically all the time at some point or other on every road.

Various means of preserving the life of ties, by burnetizing or other chemical treatment, the use of tie plates, etc., are practiced, and with some success, in lessening and postponing renewals, but they do not do away with them altogether. This constant renewal of ties, involving, as it does, considerable disturbance of the ballast, wherever they are taken out, whether singly or in large numbers, is responsible for perhaps the largest portion of the cost of track labor. The road bed has to be tamped and re-surfaced wherever ties have been renewed, and a considerable time elapses after the disturbance of the ballast by this operation before the track is again restored to its best condition. The object of the various proposals for a new system of track construction is therefore to provide some substitute for the timber cross tie.

It has been variously proposed to accomplish this by providing a tie of less perishable character, with more substantial support than is obtained by the present style of yielding ballast, or by permanent longitudinal supports of wide bearing area, on which the rails rest directly, such as is afforded by a broad base of concrete; the rails are transversely connected, or not, as may be, by metal rods. There are some difficulties about these plans, particularly in keeping the rails in proper line and surface, but the great saving in maintenance has led to their use pretty widely in tunnels and bridges. The idea of longitudinal supports for the rails, is an old one, dating from the first days of railroading, and revived several times since, but never meeting with much encouragement, particularly in this country. Whether it will be developed at this time into an acceptable and practicable system, remains to be seen.

It is certain that track construction with wooden cross ties has become unsatisfactory because of the frequency of the renewals, the disturbance of the track, the increasing cost of ties through the growing scarcity of timber, and the large sums which have to be spent annually for labor to keep the track in repair, without permanent results. Some better system will undoubtedly be developed, and at present it would seem as if the development might be along the line of longitudinal supports.

V. 69, p. 541.

San Francisco & San Joaquin bonds, see facts in that co's. statement.

GENERAL FINANCES.—The guarantee fund notes due Nov., 1898, were retired by issue of $10,596,000 general 4s, thereby obviating the necessity of issuing prior lien bonds. In July, 1898, $3,801,000 general mortgage bonds were listed, having been sold to reimburse the treasury for cash expenditures theretofore made. (V. 67, p. 123, 221.) In Mar., 1899, $2,699,000 additional gen. 4s, issued for improvements, were listed, making total listed to date $126,823,000.—V. 68, p. 570.

In December, 1898, $2,462,300 capital stock of the San Francisco & San Joaquin Valley Ry. (which see) was purchased at par. The new road embraces about 384 miles of railway, and will be fully completed in 1899 from the proceeds of its stock and $6,000,000 bonds already sold. It will afford an independent connection with San Francisco. At present the San Fr. & S. J. is completed to Stockton and has connection with San Francisco by water. See V. 67, p. 817, 841, 1355. V. 69, p. 649. Second dividend, 1¼ p. c., on preferred July 20, 1899. This payment was from the net earnings for 1898-9, which were sufficient to pay another semi-annual dividend of 1¼ per cent in Jan., 1900.—V. 68, p. 1131.

HISTORY.—Receivers were appointed in February, 1896, but on July 1, 1899, the road proper was returned to the company, the reorganization plan (in V. 66, p. 1235,) having been consummated without foreclosure and the road and equipment vastly improved in physical condition. All direct obligations, except those shown in the table, were either declared due and payable per order of Court and discharged, or exchanged for new securities (see V. 69, p. 25, 30, and V. 68, p. 1022. The reorganization of the B. & O. Southwest. was effected and new securities issued in Sept., 1899, per plan in V. 67, p. 688, the consol. mortgage of 1893 having been foreclosed and most of the underlying bonds exchanged for new securities, as per terms offered. The reorganization of the Cent. Ohio and other leased lines is still pending per plan outlined below.

NEW PARTIES INTERESTED.—In 1898, James J. Hill, President of the Great Northern Ry., and others, acquired a heavy interest in the property. See directors below. V. 67, p. 577, 632.

STOCK.—The reorganized company is authorized to issue:

LEASED LINE BONDS.—The Baltimore Belt bonds deposited were called by the company under the option reserved per agreement in V. 66, p. 1235, and purchased at par and interest on Sept. 1, 1899.—V. 69. p. 25, 277, 333.

The Schuylkill River East Side bonds, per agreement in V. 68, p. 40. are treated as follows: The road is to be leased at a rental equivalent to interest at 5 per cent on the existing bonds, but the new company will have the right to purchase all the Schuylkill bonds at 110 and accrued interest at any time after Dec. 1, 1900, and prior to Dec. 1, 1903, on 30 days' notice. The Staten Island Rapid Transit property was sold under foreclosure in April, 1899, subject to the $1,000,000 first 6s, part of which were purchased for the B. & O. RR. agrees to purchase at par and interest in cash within 5 years, and meantime to guarantee interest thereon at 4 per cent. V. 68, p. 189, 333, 525; V. 69, p. 696,

GENERAL FINANCES.—The large decrease in net earnings for the year 1898-9, it is explained, is caused by the fact that the receivers in settling their accounts have charged against the revenue of the year large sums ordinarily extending over a much longer period, and also by the large amounts put into the property and charged to operating expenses. See official statement, V. 68, p. 1224. As to physical rehabilitation under the receivership, see official statement, V. 69, p. 128.

In addition to the $49,975,000 first mortgage g., 4s issued in June, 1899, for reorganization purposes, $1,500,000 additional of said bonds, being part of the $7,000,000 reserved for corporate purposes, were used for the purpose of providing funds for the purchase of equipment and for other improvements to the mortgaged premises.

The purchase in July, 1899, of $2,052,000 of the total issue of $3,500,000 Pitts. & West. 2nd. mortgage bonds, in addition to its former holdings, will insure the reorganization of the property in the interest of the B. & O. V. 69, p. 132.

POSITION OF NEW COMPANY, INCLUDING CENTRAL OHIO SYSTEM, BALTIMORE & OHIO SOUTHWESTERN, ETC. (See V. 69, p. 31.)

"The fixed charges will thus be well within the past net income of the property—even that of the last fiscal year of extreme depression. The new company will be relieved from floating debt and the embarrasment of car and wheelage trust payments, and will start with substantial working capital." The following is also given:

Apart from the large amount provided in the plan dated June 22, 1898, to be expended on the B. & O. RR. properties, the plan for the reorganization of the Central Ohio RR. system provides $3.000,000 to be expended on the properties comprised therein and for additional equipment; and the B. & O. Southwestern plan provides $5,500,000 to be expended in like manner on the Baltimore & Ohio Southwestern System. The above statement of earnings does not allow for any increase in earnings from these expenditures, which, it is confidently expected, should largely increase the surplus over fixed charges.

ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from January 1, 1883, providing for the payment to Canada Southern of one-third the joint income over all fixed charges. The contract provided for a re-apportionment every five years, and in December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

In 1888, under the direction of Drexel, Morgan & Co., reorganized without foreclosure, and the road extended to Cincinnati. The consolidation with the Richmond & Alleghany was consummated in January, 1890. The Elizabethtown Lexington & Big Sandy and other roads were absorbed in 1892. In September, 1893, the Chesapeake & Ohio Steamship Co., controlled by this company, began operations. See below and V. 55, p. 1078.

CAPITAL STOCK.—Common stock is $60,513,900; increased from $45,000,000 to this figure since 1892 through exchange of practically all the $25,000,000 of preferred stocks for common stock and general mortgage 4½ per cents in certain proportions. *First preferred* for $18,700 and *second preferred* for $4,000 only was outstanding July 1, 1899. See terms of exchange in V. 54, p. 642.

DIVIDENDS.—First dividend, 1 p. c., paid Oct. 25, 1899. V. 69, p. 383.

BONDS.—The *series A bonds of* 1878 cover, subject to the *purchase money 6s*, the main line from Richmond, Va., via Charlottesville to Ashland, Ky., 428 miles, and are equally secured with the *Peninsular Extension 6s* by first mortgage on extension to Newport News, 75 miles.

The *consolidated mortgage* due in 1939 is for $30,000,000 (trustee, Central Trust Company), and sufficient bonds are reserved to provide for prior liens. This mortgage is also secured by deposit in trust of the $11,000,000 bonds and two-thirds of the stock of the Maysville & Big Sandy RR., [on road Ashland to Covington, Ky.], and of the Bridge to Cincinnati, all owned by Ches. & O. (Abstract, V. 49, p. 147.)

Richmond & Allegheny Division bonds cover the low-grade freight route from Richmond via Lynchburg to Clifton Forge and branches. (Mort. abstracts, V. 51, p. 144.)

The *general mortgage of* 1892 (Central Trust Co. and H. T. Wickham trustees) is for $70,000,000, but additional amounts at $25,000 per mile may be issued for double-tracking. Of the $70,000,000 as above, $32,691,000 bonds were reserved to provide for the $30,000,000 consols of 1889, issued or to be issued, etc. The balance unissued may be sold for new acquisitions, rolling stock, etc., but not more than $2,000,000 thereof in any one year. The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. In Oct., 1899, $26,055,000 had been listed on New York Stock Exchange.

The *Elizabeth'n Lexington & Big Sandy* first mortgage bonds, interest on which has been reduced to 5 per cent, have been endorsed with the C. & O. guaranty of principal and interest, and general mortgage bonds have been set aside to retire them at maturity.

The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. Bridge Co.

OPERATIONS, FINANCES, &C.—Since the reorganization in 1888, when the control of the company was placed for five years in the hands of trustees, the property has been greatly enlarged and improved. This is one of the so-called Morgan-Vanderbilt lines.

The interest charges for the fiscal year 1899-00 are estimated at $3,220,616, against $3,133,097 in 1898-99. V. 67, p. 322. In Jan., 1898, $1,590,000 4½s were sold at a price sufficient to pay off all loans and accounts and provide a cash surplus for working capital.

The steamship line was formally opened Sept. 7, 1893, and owns six new steamers, using the railroad wharves at Newport News.

The stockholders were to vote Oct. 24, 1899, upon a proposition to aid the Greenbrier Ry. to construct its road by the issue of not over $3,000,000 C. & O. 4 per cent gold bonds, payable Dec. 1, 1999, secured by mortgage on the Greenbrier Ry. V. 69, p. 383.

HISTORY.—Succeeded to the property in October, 1862; the St. Louis Jacksonville & Chicago RR. has been merged. (V. 69, p. 645.) In April, 1899, the road was purchased by the Harriman syndicate, as below stated, and, it is understood, will be operated in the joint interest of several of the leading trunk lines, Union Pacific, etc.

STOCK.—The preferred stock has prior right to a non-cumulative dividend not exceeding 7 per cent from net earnings and (after payment of 7 on common) also shares with common in any surplus.

LEASED LINES.—The *Kansas City St. Louis & Chicago* is leased in perpetuity from Nov. 1, 1877, at rental of 35 per cent of gross earnings. Its bonds are held by the U. S. Trust Co. as security for Alton bonds of 1878. These have a sinking fund (in 1896) of $135,690 per annum. Common stock, $271,800, of which $157,600 owned by C. & A.

The *Joliet & Chicago* is leased from January 1, 1864, for the term of its charter, and forms part of the main line. Rental, 7 per cent on stock.

The *Louisiana & Missouri River RR.* was leased in perpetuity, Aug. 1, 1870. Under the agreement of Nov. 13, 1894, the Alton assumed to pay, in lieu of rentals, all interest on the *first* and *second* mortgage bonds and their principal when due, also 7 p. c. per annum on the guaranteed preferred stock, and also to purchase the L. & M.R. unguaranteed preferred at $29 50 per share and the common at $10 per share. V. 59, p. 1057. Unguaranteed preferred stock is $1,010,000 and common $2,312,700, neither of which have ever paid dividends. In Dec., 1898, all but 247 shares of unguaranteed preferred and 445 shares of common stock had been purchased by Chicago & Alton.

GENERAL FINANCES.—In Apr., 1899, a syndicate composed of Geo. Gould, J. H. Schiff, E. H. Harriman and James Stillman had acquired over 95 per cent of the preferred and common stocks, paying therefor $200 and $175 per share respectively. V. 68, p. 230, 281. 379, 427, 523, 670. See official circular in V. 68, p. 281. The syndicate in May, 1899, also acquired control of the St. Louis Peoria & Northern (St. Louis & Northern Short Line), thus removing the danger of a new parallel line between Chicago and St. Louis, and also assumed the lease of the Chicago Terminal Transfer terminal facilities at Chicago under a modified rental. V. 69, p. 26; V. 68, p. 1022, 1225.

The mortgage securing $40,000,000 3 per cents, dated Oct. 1, 1899, will refund bonds marked "¶" in table maturing during next four years, and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders subscribed in July, 1899, for the $40,000,000 new bonds at the rate of $650 cash for each $1,000 face value, the first $10,000,000 (25 per cent) being paid for Oct. 10, 1899. V. 69, p. 591. See official circular in V. 69, p. 178; also p. 26, 129, 541.

ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. In 1880 the Burlington & Missouri in Nebraska was absorbed. The leased lines are practically owned and there is no charge for rentals in the income account, except as interest on bonds. The Chicago Burlington & Northern and various other subsidiary lines situated in Illinois were absorbed in May, 1899. V. 68, p. 975.

In June, 1899, contracts had been let for a portion of the extension of the Burlington & Missouri River from Alliance, Neb., south about 250 miles to Brush, Col. V. 69, p. 26, 756; V. 68, p. 975.

Extension was also proposed from Oskaloosa west about 15 miles to the Des Moines & Albia division, near Hardy, thus giving the company a second line between Des Moines and Burlington. V. 68, p. 1224.

LANDS.—Only 48,372 acres remained unsold June 30, 1899, land notes outstanding, including interest payable, $154,630.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Jan. 1, 1898, to July, 1899, $11,721,200 stock was issued to retire an equal amount of convertible debentures, leaving still outstanding $3,542,700 convertible bonds. In April, 1899, $4,041,500 additional stock was subscribed at par. See "General Finances" below.

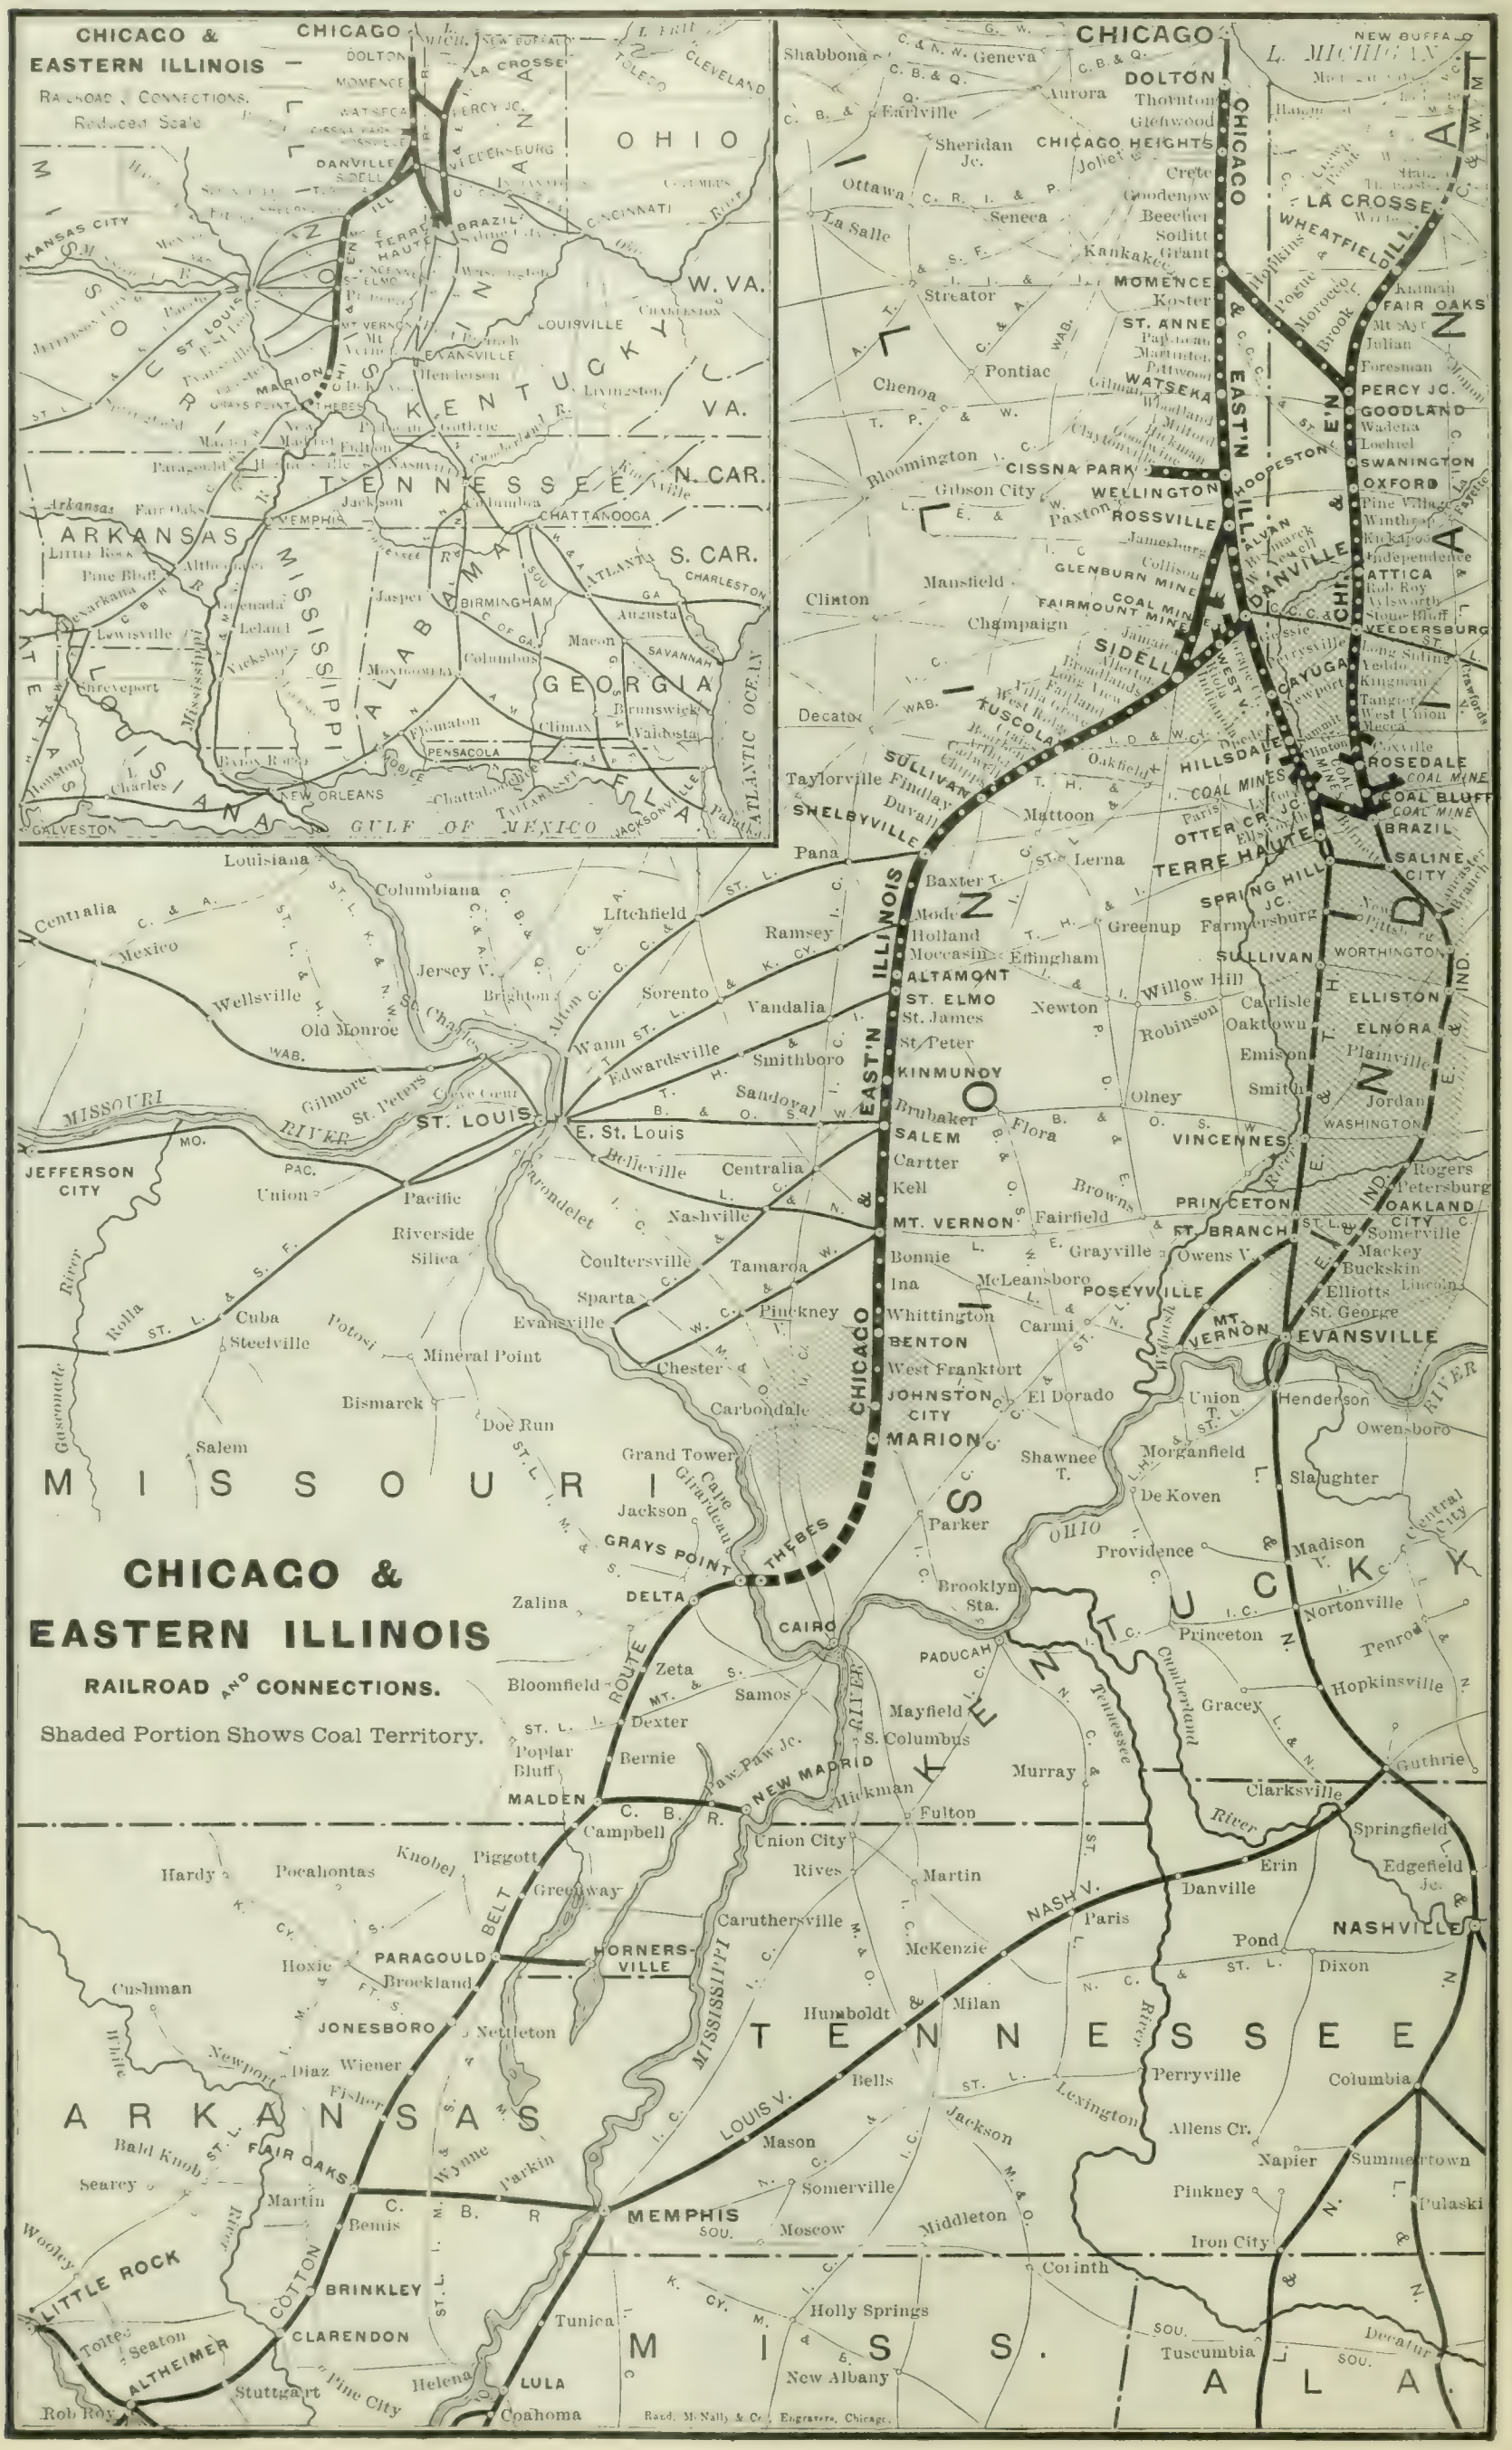
BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.

The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River (including the Chicago Burlington & Northern and other lines to be merged), upon the payment of $28,924 000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and an additional $16,166,000 were issued in 1899 (with $4,041,500 stock) as below stated, to retire Chic. Burl. & Nor., etc., bonds, aggregating $13,787,500 and costing $14,235,575 and to pay for improvements, etc. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.

The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which Jan. 1, 1897, there were 88 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)



Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1899, of the bonds given above as outstanding: Of g, $4,714,800 July 1, 1899; h, $1,930,000; k, $307,000. Also canceled bonds not included above, f, $3,364,000, July, '99.

The collateral trust *Nebraska extension* bonds of 1887 (New England Trust Co., of Mass., trustee) are issued at $20,000 per mile for single and $10,000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $231,200 having been retired in 1896. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $11,721,200 had been thus converted up to June 30, 1899. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

Many of the bonds are redeemable (may be drawn) before maturity at various prices, plus accrued interest, as stated in the table above.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In May, 1899, all of the bonds and most of the stock of the Keokuk & Western RR (which see) was acquired. V. 69, p. 756.

In April, 1899, stockholders subscribed pro rata for $16,166,000 new 3½ per cent bonds at 75, and $4,041,500 stock at par, in blocks of $1,000 bonds and $250 stock, for which $1,000 paid, $500 on June 8 and $500 on Sept. 8. This issue of 3½ per cent bonds is limited to $85,000,000, as above stated, and is designed to retire eventually the bonded indebtedness of all the lines east of the Mississippi River. The lien will become an absolute first mortgage on payment of the consol. 7s and the Chicago & Iowa division 5s. The present issue is made to take up the bonds of Chicago Burlington & Northern RR. and $1,076,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds began July 1, 1899. See circular V. 68, p. 771; V. 69, p. 951. The C. B. & N. was merged in May, 1899.

The company's sinking funds have received to June 30, 1899 over $19,250,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1898-9 the aggregate sinking fund income was $1,143,318, of which $523,619 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

Debentures aggregating $31,910,900 have been issued; of this amount $9,000,000 was used to purchase the Hannibal & St. Joseph, from which a good income is received, while $7,647,000 was used to buy other stocks and $15,263,900 (since mostly converted into stock) for improvements, etc.

As unencumbered assets, on the other hand, the company owns besides the $14,244,900 Hannibal & St. Joseph stock above mentioned, a large amount of stocks and bonds, a list of the same being in V. 63 on pages 778 and 877. The road owned unbonded and the roads whose bonds are all owned were in 1898, as follows:

	Miles.
Northerly Extension, Alliance, Neb., to Billings, Mont., and branches	621
St. Louis Keokuk & N. W. (all its $15,593,800 bonds and stock owned and unpledged Keokuk, Ia., to St. Louis, Mo. (Net earnings in 1894-95, $691,026)	226
Other lines of moderate earning capacity (Ch. Burl. & K. C., etc.) securities all or nearly all owned and unpledged	477

An article covering fully the above points was in V. 63, p. 775.

The *general consol. and 1st* mortgage of 1887 (trustee, Central Trust Company) provides for the retirement of $6,042,000 prior bonds and for issue of bonds on new road at $18,000 per mile for single track also for bonds for equipment at $7,000 per mile and for double track at $8,000 per mile. In 1897 the total issue of gen. consol. bonds was limited to $30,000,000 and bonds were reserved for Chicago & Indiana Coal firsts. See V. 64, p. 1088. The gen. consols are a *first* mortgage on 256 miles of road, including the line from Rossville via Sidell to Altamont, etc.; also on equipment valued at $2,657,000, and upon real estate in Chicago costing over $1,200,000. They also cover 106 miles of double track from Danville to Dolton, Ill., and rest of property subject to prior liens.

The Leavenworth Terminal Ry. & Bridge is used into Leavenworth.
In Sept. 1898, the Chicago Gt. West. was surveying a preliminary line from Hampton, Ia., to Omaha, Neb. V. 67, p. 481. See also V. 67, p. 1308.

HISTORY.—The Chicago St. Paul & Kansas City was organized in May, 1886, and in December, 1887, merged with Minnesota & Northwestern. In August, 1892, reorganized per plan, Vol. 55, p. 856. Each $1,000 of Minn. & N. W. and Chi. St. P. & K. C. first mort. bonds was given $500 debenture stock and $600 pref. "A" stock.

On Sept. 7, 1893, the Chicago Great Western Co. having thus become the owner of over 97 per cent of the 1st mortgage bonds and over 99 per cent of the general mortgage bonds, acquired by deed the title of the Chicago St. Paul & Kansas City Ry. (815·67 miles), subject to the mortgages, the bonds which it owns being kept alive. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

SECURITIES.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock and of the trust deed were fully set forth in the editorial article of the SUPPLEMENT for October, 1897.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

On New York Stock Exchange in October, 1899, $16,771,500 debenture stock had been listed, including $3,300,000 four per cent debenture stock to be used to retire the $2,823,150 priority loan on Jan. 1, 1900. V. 69, p. 451. Cash interest was resumed on all the debenture stock and *all* the preferred "A" is entitled to cash dividends since July 1, 1899.—V. 67, p. 1206.

DIVIDENDS.—On pref. paid Jan, 1899, 2 p.c.; in July, 1899 2 p. c.

FINANCES.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund in the near future the following securities: Ch. St. Paul & K. C. 5s, subject to call at 105, $2,323,150; equipment lease warrants, $1,673,000; sterling. loan 6s, $1,454,000; gold notes 5s, $1,100,000, and for improvements. V. 68, 186. Of this new stock, $3,300,000 has been arranged to be sold to retire the $2,823,150 priority loan (the only mortgage debt), to be called and paid Jan. 1, 1900, and no more will probably be issued until 1901, when certain car trusts mature. V. 68, p. 669, 1131. The estimated savings in interest charges will be $91,218 annually. By improvements of the permanent way, etc., operating expenses were reduced in 1898-9 to 67·21 per cent of earnings, against 70·13 per cent in 1897-8 and 77·47 in 1894-5.—V. 69, p. 501.

The main line of the Wis. Minn. & Pac., extending from Red Wing, Minn., to Mankato, 93·7 miles, purchased from the Chic. R. I. & Pac. has been operated since June 1, 1899. V. 68, p. 976.

HISTORY, &C.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In 1899, all the stock and bonds of the Des Moines Nor. & West, 147 miles, were acquired, the C. M. & St. P. taking possession July 1, 1899.—V. 68, p. 40, 975. In May, 1899, contracts were let from Rockwell City to Storm Lake, Iowa, 39 miles, and Fonda, Iowa, to Spencer, 44 miles. V. 69, p. 544. Extension of Libertyville line to Fox Lake, Ill., 20 miles, also under construction. In July, 1899, extension from St. Paul to Duluth was being considered. SEE V. 69, p. 179. The stockholders voted Sept. 23, 1899, to merge by consolidation the subsidiary leased lines in Illinois, V. 6[illegible], p. 228, 694.

CAPITAL STOCKS.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1899, $15,775,000 prior lien bonds outstanding were exchangeable for preferred.

The following bonds are *convertible into preferred stock* at any time within ten days after a dividend shall have been declared and become payable on the preferred: Iowa & Dakota Extension 7s, River Division 7s, Chicago & Milwaukee 7s of 1903, Hasting & Dakota 7s of 1903 and Ch. Mil. & St. P. consols of 1875. The consols of 1874 also are convertible into preferred within 15 days after dividend day. The convertible bonds were fully described in SUPPLEMENT for Mar. '93, p. 2.

Chicago & Pacific Western Division 1st 5s were issued at $20,000 per mile for road, with additional amounts for equipment and bridges; no further bonds can be issued. The prior lien bonds cannot be extended, but will be paid off at maturity.

On June 30, 1898, the following amounts of general mortgage bonds had been issued or were reserved for the purpose indicated, viz:—

Listed on New York Stock Exchange.....	$26,176,000

Total reported by the company as outstanding.....	$33,683,000

The $3,113,000 "available for improvements, etc.," of bonds above mentioned are applicable for premiums paid in retiring or refunding convertible and other prior lien bonds bearing a higher rate of interest than 4 p. c., for cost of branches, second and side tracks, real estate, bridges, rolling stock, equipment, etc. On July 1, 1899, of the prior lien bonds outstanding, $15,775,000 (maturing 1902-1908) were convertible into preferred stock; if from time to time so converted they will set free a like amount of general 4s which, with the $17,906,500 reserved against bonds already converted, will become available for improvements, additions, etc., as soon as the balance ($3,113,000) of the amount originally reserved for improvements has been so expended. V. 48, p. 830; V. 50, p. 205. N. Y. Stock Exchange to Oct., 1899, had listed $26,176,000 generals—see "General Finances," V. 65, p. 462, and V. 66, p. 335.

Also has large interest in Chicago St. Paul Minneapolis & Omaha, 1,492 miles.

In Oct., 1899, the Boyer Valley Ry., 90 miles, and the Minnesota & Iowa Ry., 119 miles, were under construction, their bonds to be issued at the rate of $16,000 per mile to be guaranteed, principal and interest, by the C. & N., which will probably absorb the roads after completion. In Aug., 1899, the Boone County Ry., incorporated in the interest of the C. & N., had under construction 7⁴₁₀ miles.—See V. 69, p. 290.

HISTORY, &c.—The Chicago & North Western Railway was organized in 1859, and has since absorbed many other roads.

In December, 1882, a controlling interest was acquired in the stock of the Chicago St. Paul Minneapolis & Omaha Co., which see.

In July, 1884, the capital stocks (except a few shares) of the Fremont Elkhorn & Mo. Valley and the Sioux City & Pacific were acquired on the terms stated in the SUPPLEMENT of June, 1885, and prior issues. Their securities, except those held by Chic. & N. W., are in table above.

In December, 1891, the Milwaukee Lake Shore & Western RR. was bought by an exchange of stock. See V. 57, p. 375; V, 56, p. 792.

CAPITAL STOCK.—Of the common stock $2,333,688, and *preferred* $3,795 remained in the co's treasury in July, 1899. Pref. stock has a prior right to 7 p. c.; then common 7 p. c.; then preferred 3 per cent; then common 3 per cent; then both classes share.

BONDS.—*Refunding Mortgage.*—See **Abstract** in V. 65, p. **1175** The authorized issue is $165,000,000 (United States Trust Co., trustee). $131,640,000 are reserved to retire underlying bonds, and remainder for additions and improvements, $4,000,000 at once and $1,000,000 a year thereafter. The bonds may be issued bearing such rate of interest as shall be deemed advisable. See V. 65, p. 1070. The first issue of $20,000,000, bearing 3½ per cent (reg. interest Q.—F., coupon M. & N.), has been sold to Kuhn, Loeb & Co., of N. Y.—see "general finances" below and V. 65, p. 69, 111, 571. Up to Oct., 1899, $8,775,000 had been listed. V. 67, p. 125. The $1,641,000 Chic. & M. first 7s were paid at maturity July 1, 1898. V. 66, p. 1139.

The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in SUPPLEMENT of May, 1894. Of the sinking fund bonds of 1879 $6,069,000 are 6s; the sinking fund is at least 1 per cent of outstanding bonds, which are subject to call at 105; and through its operation the amount outstanding has been reduced from $15,000,000 to the present figure.

The *sinking fund debentures* of 1933 have a sinking fund of $200,000 per year, if they can be redeemed at 105. These, as also the *debentures* of 1884 and 1891, will be secured by any future mortgage excepting any mortgage "for the enlargement, improvement or extension of the company's property." See description of all the debentures on page 2, SUPPLEMENT of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced to present figures by sinking fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elk Horn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the Wy. Cent. having been consolidated with F. E. & M. V.], etc. To Oct., 1899, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, July 1, 1899, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock.

LAND GRANT.—The report for 1898-99 showed that the total consideration for the lands and lots sold in that year amounted to $499,192. Net cash receipts were $602,103. The statement of amounts secured to be paid to the company by outstanding contracts of sale in force at the end of the fiscal year showed a total of $724,657. The lands unsold and uncontracted for May 31, 1899, were 647,975 acres.

GENERAL FINANCES.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. Maple River first 7s for $402,500 fell due July 1, 1897.

In 1898-99 the average freight train load was 208 tons, against 194 tons in 1897-8; rate per ton mile, 0·87 of a cent. In calendar year 1896 of 15,772,642 tons of freight carried, grain furnished 12·73 p. c., coal 12·61 p. c., ores 22·31 p. c. and lumber 6½ p. c.

EARNINGS.—Jan. 1 to Aug. 31, 1899 (8 months), gross, $25,993,062, against $23,228,293 in 1898.

ANNUAL REPORT.—Fiscal year ends May 31. The annual meeting is held the first Thursday in June. The report for 1898-99 was given at length in V. 69, p. 226, 279, 287. See also editorial, p. 259.
